STATEMENT OF PURPOSE

Nexus recognises that humanity is undergoing a massive transformation. With this in mind, Nexus seeks to provide 'hard to get' information, so as to assist people through these changes. Nexus is not linked to any religious, philosophical, or political ideology or organisation.

Editorial

Welcome to the latest issue of NEXUS! As usual, we have yet another info-packed edition, full of what I suspect are pieces of a giant jigsaw puzzle. These pieces of information are for you, the reader, to consider if and where they fit into your picture of life.

We would like to think that the type of information we present in NEXUS motivates people to reassess what they may have taken for granted, in terms of their view of the world. I experienced an example of this while I was reading a book I reviewed in the last issue of NEXUS, titled "The Facts Of Life", by Richard Milton. This book completely demolishes the Darwinian-type ideas of the theory of evolution, and I found myself profoundly affected by it. Obviously, my subconscious had totally accepted the high-school explanation for the origins of life without much further questioning. So it really felt as though someone had pulled a plant out of my head, roots and all, by the time I had finished this book. (Makes you wonder how many other unfounded beliefs I've got tucked away in the grey matter.) I strongly encourage anyone who believes we evolved from monkeys to examine the scientific proof that shatters this myth. I am sure you will be left feeling as I.

Importantly, I thought, the book did not seek to replace the theory it so soundly destroyed: instead, it left the reader to draw his or her own conclusions as to what it all means.

This is something we consciously encourage with the information we present through NEXUS—that is, to let our readers think for themselves and follow up on topics that strike a chord. Hopefully, many of the articles we publish make people question the consensus reality that we appear to be pushed into believing.

By the time you have finished reading all we have published so far—plus all we have yet to publish—you will end up either totally paranoid and won't know what to believe any more about anything; or you will end up with a healthy questioning mind which at least knows what not to believe in. Either way, you will probably be considered an oddball by mainstream society. Whilst people may say we are brave for publishing NEXUS, I have got to say that you are equally brave in reading it!

Back to this issue: I would like to draw your attention to several (in fact, all) articles in this issue. First up, I have to apologise for not being able to publish more photographs of the amazing hieroglyphs found near the Hunter Valley in NSW. They are incredible. When I first heard about them I was dubious, but when I saw the photos—wow! Get the video and you'll see what I mean. (See page 20.)

I am also very proud to be able to reprint an extract from my father's latest book, "Journey Into Oneness". I unbiasedly recommend everyone to read this book. I will be interested in any feedback.

Something else I have been meaning to mention here is that NEXUS can be contacted via email, for all you computer networkers out there. Our email address is nexus@peg.apc.org. Actually, while I think of it, I am keen to get NEXUS articles on the networks, but I need some help. Any takers?

Lastly, I must make an apology. In NEXUS vol. 2, no. 16, we published an article entitled "Psychic Warfare & Non-Lethal Weapons" written by Armen Victorian in the UK. I omitted to indicate that this article first appeared in "Lobster" (#25, June 1993), a great English newsletter that I make a point of reading cover to cover. (Contact: "Lobster", 214 Westbourne Avenue, Hull, HU5 3JB, UK.)

Happy reading,

Duncan

WARRANTY AND INDEMNITY

Advertisers upon and by lodging material with the Publisher for publication or authorising or approving of the publication of any material INDEMNIFY the Publisher and its servants and agents against all liability claims or proceedings whatsoever arising from the publication and without limiting the generality of the foregoing to indemnify each of them in relation to defamation, slander of title, breach of copyright, infringement of trademarks or names of publication titles, unfair competition or trade practices, royalties or violation of rights or privacy AND WARRANT that the material complies with all relevant laws and regulations and that its publication will not give rise to any rights against or liabilities in the Publisher, its servants or agents and in particular that nothing therein is capable of being misleading or deceptive or otherwise in breach of the Part V of the Trade Practices Act 1974. All expressions of opinion are published on the basis that they are not to be regarded as expressing the opinion of the Publisher or its servants or agents. Editorial advice is not specific and readers are advised to seek professional help for individual problems.

Letters to the editor...

NB: Please keep letters to approx. 100-150 words in length. Ed.

Re: NEXUS Monthly

Dear Duncan, This is this letter's 4th draft in an effort to get it under 150 words. I didn't realise I was so long-winded. This time I will be super-succinct. Congratulations on the magazine. It is excellent and any success is well deserved. I appreciated the information on the Cebu AIDS Clinic info. Everywhere else just dried up on that one, didn't it? My only complaint about NEXUS is that it is hard to 'maintain the rage' on a quarterly basis. I could easily devour an issue a week (even an issue a day, but I wouldn't get much work done). How about a compromise? Come on, an issue a month—how's that? Do an issue a month and (I promise) I'll (finally) take out a subscription.

Honestly,

Peter H., Arana Hills, Qld.

(Dear Peter, Thank you for your kind comments. I should point out however that we are not a quarterly, but a bimonthly magazine, and one day when we are sure that we can do it, we will go monthly. Ed.)

Re: Getting Organised

Dear Duncan, I happen to be one of the many with an inquisitive mind who doesn't regard NEXUS as rat-bag or New Age. Ages, like seasons and sunrise, are eternal, so how the hell can any age be "new"? "New Age" is a contradiction in terms. Furthermore, all of your correspondents write of hidden and "age-old" truths which were known, studied and used years, and even centuries ago. So what's "new"?

To continue, years ago in the 1950s, and even prior to that, I can clearly remember older people speaking of the car capable of 1,000,000 miles of trouble-free motoring, the car that ran on water, women's stockings that never wore out (used during WWII) but, like Indian hemp, quickly smothered at war's end.

I could go on and on, but the point I make is: what happened to these geniuses and why did it happen?

The answer is, quite simply, that these inventors were too reclusive. They had no idea of organisation and, naturally, they lost to the multi-nationals and the monopolists. Evidently, they will lose again unless they organise! This of course means developing political clout.

It's useless for these people in the fields of medicine, finance, constitutional reform, social justice, bank reform, etc., to attempt forming new political parties. They must learn

how to invest—and control—an existing major political party. Alternatively, like the Fabian Socialists, they could well consider investing all groups, political and non-political.

This last, however, can be dangerous where the likelihood exists of being turned from your original course in pursuit of "social justice" in its many and contradictory forms. (Social justice emanates from the people and is demonstrated in citizen-initiated referendums.)

If not inclined to do this, then obviously these inventors and others will lose out again, and the the sufferers will be mankind.

For the past three years I have been engaged in building an Australia-wide network and have recently extended to the US.

Any assistance I can render these inventors, reformers, etc., via the use of my network which connects directly and indirectly to an (estimated) 2,000 groups nationwide, will be considered an honour and pleasure. Contact me if you consider it worthwhile.

Re: Fighting for Freedom

Dear Duncan, I have been buying NEXUS for the last 3 years and have never read such informative articles as the ones you present each issue. I have always been interested in anything suppressed by people in higher places, so it was mind-boggling to read the article by Dr Strecker on the AIDS cover-up (vol. 2, no. 18). Can you try and get some more articles on this guy as he still left a few questions unanswered. I know they are talked about on his video but couldn't find any coupon for it.

It's a real shame that many people walk around with their heads in the sand, believing everything governments throw at us. If people knew what actually goes on behind the scenes, they would still question it, such is the heavy influence of the diet of propaganda that they are fed daily. Still, each day the people of this planet are slowly waking up and taking responsibility for their 'own' lives—this is the worst fear any government faces.

So, for all those freedom fighters out there, Fight The Powers That Be and one day we will all be free to say, do and act how we all want to.

Thank you again for the many hours I have spent enjoying the arti-

cles that no other magazine is brave enough to print.

Cheers and God bless,

Bryn M., WA.

PS: Have you guys got any car stickers advertising yourselves? If so, let me know and I will gladly buy some.

(Dear Bryn, See the advert on page 42 of this issue for the Strecker Video, and yes, no doubt we will one day have NEXUS bumper stickers and T-shirts available. Stay tuned! Ed.)

Re: Amazing Book!

Dear Duncan, In NEXUS vol. 2, no. 8, you made mention of the book *Thinking and Destiny*, which you had promised to review, until you realised what a mammoth task you had taken on. Nevertheless, you did imply you might review it at some later date—which you have not in fact done.

I had seen the rather large advertisement for this book which, at the time, I had felt was a bit over the top, seemingly promising much that I doubted it could deliver.

Well, your comment in NEXUS was all that was needed to give the advertisers of the book some credibility in my eyes, so I there and then ordered a copy of said book.

Boy, was I surprised. Much the same initial reaction as yourself, I don't doubt. However, I got stuck into it and, much to my amazement, it was everything the advert had stated only much, much more. It is apparently not generally available at any bookstores, so I shall be forever grateful to NEXUS for bringing this book to my attention.

Good luck for the future!

Vicky P., Ballajura, WA.

(Dear Vicky, Glad you liked the book. For those interested, see the advert on page 4 of this issue. Ed.)

Re: AIDS Man-made?

Dear Duncan, Finally I feel vindicated. I have been saying to people for years that AIDS is a Deliberate 'Cull' mechanism. However, I believe it is the result of an Alien/Human agreement.

This is also the reason why there is an incredible ongoing suppression of The UFO Scene, Free Energy Devices, Antigravity Research Groups, Electrogravitics. We are all 'locked' into a technological stall.

I firmly believe a 'DEAL' has been struck between a Human Agency and an Alien Agency. Part of that deal is an agreed-upon kill-off, say 90% of the human race. I am con-

vinced, after reading the article, that we now have the full horrific picture. Everything ties in—Abductions, Cattle Mutilations, Secrets, etc. Other benign alien groups most likely maintain a 'no interfere' stance.

Randle G., Glenfield, NSW.

Re: Readers with Brains

Dear Duncan, I would like to ask your indulgence and publicly state, via your Letters to the Editor column, that my (registered) business, trading as Caradoc (Elint), which advertised in the December '93-January '94 De-classified section of your excellent magazine, has absolutely nothing to do with the business advertising as "Caradocs Celtic Cauldron" in the February-March '94 issue.

My thanks also to the NEXUS readers from all over Australia and New Zealand who responded to my ad—and patiently waited while we resolved our computer glitch. It just goes to show that NEXUS really is read everywhere, and the readers have brains which work (a rare commodity). I will be advertising again soon. Thank you for a great magazine.

Yours sincerely,

John Batty, Caradoc (ELINT)
Nanango, Qld.

Re: Banking on Truth

Dear Mr Roads, This letter is in response to the latest issue of your NEXUS publication, specially the third part of the history of banking by Richard Hoskins.

The article was so relevant and yet this sort of information is so seldom seen. It points out one of the most crucial events in history, which affects hundreds of millions of people in their daily lives. To ignore these facts is to insist the problem remains unsolved.

Regarding the Bank of England, Bramley, in a book, *Gods of Eden*, reports the actual gold lent to the Crown in 1694 was £72,000, which was vastly inflated by issuance of bankers' notes to £1.2 million. The first year's interest more than repaid the capital.

Do not be persuaded to stop printing these truths. You may know even Henry Ford was coerced to stop telling this very story in his own publications, and to apologise—but he let money dominate him. Thank you.

Kind regards,

Vyvyan S., Lismore, NSW.

ANIMAL TESTING STOPPED ON L'OREAL COSMETICS

The world's largest cosmetics company, L'Oréal, has ended a four-year battle with an animal rights group by agreeing to halt cosmetics tests using animals.

People for the Ethical Treatment of Animals (PETA), a group based in Washington, led a consumer boycott campaign against L'Oréal, asserting amongst other things that the company fried live animals to test sunscreen make-up.

PETA said its next target would be Gillette, which it accused of blinding and poisoning animals to test products ranging from shaving cream to liquid paper.

(Source: *Courier-Mail*, 14 October 1993)

FDA CONSIDERS BAN ON NICOTINE

The US Food and Drug Administration (FDA) is considering a ban on any cigarettes strong enough to get people addicted to nicotine.

FDA Commissioner David Kessler said that nicotine's addictive nature could give it the legal definition of a drug and has asked Congress for "direction on the matter".

He also said there was mounting proof that cigarette manufacturers were

deliberately increasing nicotine levels to get more smokers addicted.

Kessler has advised that if the FDA decides on the classification, it could lead "ultimately, to the removal from the market of tobacco products containing nicotine at levels that cause or satisfy addiction".

It may end up with people having to obtain their cigarettes and tobacco from a chemist or drug store, on a prescription from a doctor who has registered you as "addicted".

(Source: *Sunday Telegraph*, 27 February 1994)

OVERUSE OF ANTIBIOTICS IS HAVING BAD SIDE-EFFECTS

1) A leading scientist has warned that the world is threatened with a medical disaster, because a key pillar of twentieth century medicine is crumbling.

Professor Alexander Tomasz, a world-renowned microbiologist, said recently that antibiotics are in danger of becoming powerless to fight off new strains of super-resistant bacteria.

Delivering a keynote address to the American Association for the Advancement of Science in San Francisco, he said: "Already some strains of bacteria have been found to carry resistance to every antibiotic known to medicine."

He warns that diseases that are now curable, such as tuberculosis, pneumonia, blood poisoning, etc., could return this decade as the mass killers they once were.

(Source: *The Observer*, 20 February 1994)

2) According to an independent British researcher, Dr Lisa Landymore-Lim, the increasing incidence of asthma in Australian children (the highest in the world) may be linked to commonly prescribed antibiotics and penicillin.

Australians consume twice the amount of prescription drugs per head of population than many other western countries, and this could be a factor in why Australia has the world's highest levels of asthma, especially in children.

Her three-year study showed that the younger the age at which antibiotics were regularly prescribed, the younger the age at which asthmatic symptoms were reported.

(Source: *The Australian*, 3 January 1994)

DOCTORS KILL FIVE TIMES AS MANY PEOPLE AS GUNS!

The 1990 Harvard Medical Practice Study suggests that, each year, 150,000 people die from the negligence of doctors. Since there are about 300,000 doctors in the USA, that means each year approximately one out of every two US doctors kills a patient negligently. Over a thirty-year career, this could mean the average doctor would negligently kill 15 patients.

Since there are about 200 million guns in the US, and about 30,000 people

... GLOBAL NEWS ...

die annually from gun assaults, suicides and accidents combined, each year an American gun has a 1 in 6,666 chance of killing someone.

This means that any doctor, any year, is 3,500 times as likely to kill someone as any gun!

Even the raw numbers are astonishing: doctors kill five times as many people as guns. Think about it! Should we be turning in our guns, or turning in our doctors? Come to think of it, why is the AMA pushing gun control? Why not doctor control?

(Source: Dr Edgar A. Suter, *Doctors for Integrity in Research & Public Policy, San Ramon, CA, USA. Found in Borderlands, Fourth Quarter 1993*)

RUSSIA'S SECRET WEAPONS?

In case you haven't noticed, the Western media has been working overtime to portray the most popular man in Russia, Vladimir V. Zhirinovsky, as a clown on the one hand, and as another Hitler on the other. Obviously he is upsetting the global picture for somebody.

In a recent interview on *Sixty Minutes*, Zhirinovsky informed the reporter that he had been offered huge sums of money from both US and Japanese sources to "quit politics". Figures of hundreds of millions of US dollars were mentioned. According to Zhirinovsky, the US wants Russia in a "weak" position internationally, preferably with the alcoholic Yeltsin at its helm.

What is interesting is Zhirinovsky's mention of Russia's secret weapons. One weapon he refers to as the "Elipton", which he claims utilises light, could devastate the entire world if used correctly. Other secret weapons he claims use sound and radio waves.

Sound familiar? Go back and read the NEXUS articles on non-lethal weapons in previous issues, and maybe old mad Vlad is not so mad after all.

(Source: *International Herald Tribune, 23 December 1993*)

CONFERENCES OF INTEREST

• NON-LETHAL DEFENSE

This Conference, classified "Secret, U.S. Only", was held mid-November 1993 in the Applied Physics Laboratory at Johns Hopkins University, Maryland, USA.

Non-Lethal Weapons are those weapons that aim to incapacitate the enemy rather than just kill, and include radio-frequency weapons, light and laser weapons, sound-wave weapons, and more.

Chairman of the Conference was none other than Dr John Alexander, member of PsiTech, and Program Manager for Non-Lethal Defense at Los Alamos Laboratory. For more information on this man and Non-Lethal Weapons, refer to the article entitled "Psychic Warfare" in NEXUS vol. 2, no.16.

Other invited guests included Dr Edward Teller and Janet Reno, Attorney General of the United States.

• TREAT VI

TREAT is an acronym for Treatment and Research of Experienced Anomalous Trauma. The Conference is to be held 28th April to 1st May this year in Virginia Beach, Virginia USA.

Subjects discussed at this conference include "non-conventional information-access systems and anomalous experiences such as out-of-body information gathering...".

So just how seriously do the military take astral espionage? Well, one of the co-Chairmen is Major General (Ret.) Albert N. Stubblebine III, a former Commanding General of the US Army Intelligence and Security Command, whose background includes parapsychology as well as intelligence.

BEHIND THE HEBRON MASSACRE

Official reports from Jerusalem reveal several disturbing facts about Barukh Goldstein, the Israeli settler who cold-bloodedly slaughtered 48 worshippers in the holy Ibrahimi Mosque. Instead of firing automatic bursts from a relatively low-powered 9-mm Uzi sub-machine-gun—the standard weapon of Israeli settlers—Goldstein fired aimed, high-speed semi-automatic shots at up to 90 rounds per minute from a powerful Galili assault rifle. Each of his five ammunition clips held 30 high-velocity fragmentation rounds: hallmarks of a planned Special Operations assassination.

Long before Western media networks started distorting the true facts behind the mass assassination in the Ibrahimi Mosque, the Palestine Human Rights Information Centre in Jerusalem compiled an accurate report based on eyewitness accounts and clinical hospital evidence. At dawn on Friday 25th February, during Ramadan, the Moslem holy month of fasting, Goldstein approached the Ibrahimi Mosque alone, walking in through the Ishaqiyeh entrance before taking up his position in Qour Nissa', an elevated part of the Mosque looking down on the backs of those kneeling in prayer.

When Goldstein opened fire with the Galili, he used a technique virtually

unknown to soldiers in conventional armies, but taught by the Special Operations groups of the US and Russia. Instead of firing at random with bursts of three or five bullets in full automatic mode, Goldstein fired very fast single shots with the weapon set to semi-automatic, releasing one shot every time the trigger was squeezed. Goldstein is reputed to have fired at 90 shots per minute. Kill rates are much higher using this special high-speed semi-automatic technique, but only if the assassin has received extensive training. As a medical doctor from the nearby Kiryat Arba settlement, it is reasonable to ask where Goldstein gained his high level of special operations expertise.

Perhaps the most chilling indication of direct Special Operations involvement was Goldstein's ammunition. Rather than firing conventional solid or even hollow-point bullets, staff at the local Ramallah Hospital confirmed: "All those shot were injured [or killed] by devastating high-velocity ammunition which splinters into shrapnel inside

the body, causing multiple injuries and massive haemorrhaging." Though totally banned by the Geneva Convention and every army in the world including that of Israel, Goldstein nonetheless managed to obtain up to 150 rounds of ammunition normally limited to covert special operations groups.

When Yasir Arafat stated clearly from Tunis: "This was not the work of one man: there is no Rambo", he might not at that stage have been advised of Goldstein's elevated firing platform or the use of high-velocity fragmentation bullets. Because the bullets were fired downwards at a steep angle, each one that missed its target immediately splintered into dozens of slivers of razor-sharp shrapnel on impact with the stone floor, ricocheting upwards and outwards and injuring hundreds of other worshippers.

Written by Joe Vials. (Sources: Mr Ali Kazak, PLO Representative and Ambassador of Palestine, Canberra, ACT, Australia; Palestinian Human Rights Information Centre, Jerusalem; The staff of Makassed and Ramallah Hospitals)

EUROPE'S IDENTITY CARD IS SNEAKING IN

Britain and its European Union partners are clearing the way for the introduction of identity cards, in the form of standardised "smart cards".

Smart cards differ from normal magnetic stripe cards in the way that they can store, access and process information stored on a card.

The proposed smart cards can hold enough information to store an encyclopaedia on each person.

Already Schipol Airport in Amsterdam has issued volunteers with smart cards the size of a credit card, which contain personal data with a digitised reading of the passenger's 'hand geometry' or palm print. A quick swipe of the card, combined with the hand pressed against a machine reader, is all that is required to pass immigration.

It is interesting to note that in several European countries where there is resistance to ID cards, e.g., Germany, health care cards are used instead.

(Source: *The Independent*, 3 February 1994)

SUNSPOT PEAKS AND BATTLES

This figure was prepared from the data of Professor Raymond Wheeler of the University of Kansas. He found international battles waxed and waned in cycles of approximately 11 years. His data spanned 2,500 years of world history up to 1957. By plotting the time that battles *begin* rather than the time of their peak intensity, a close connection was found with solar activity, which disturbs Earth's magnetic field and apparently changes brain rhythms and the hormone balance of humans.

The Sun has just ended a peak of activity and is now in a quieter phase. The next expected peak in solar activity will be about the year 2000. International battles have been observed to usually occur a year to two before, or sometimes a year after the sunspot peaks, but never right at the maximum.

The probability of their occurrence within two years of the sunspot peaks by chance is less than .008. This corresponds with the observation that geomagnetic activity increases either just prior to, or just after sunspot peaks, but is not strongest at the time of maximum sunspot activity.

(Source: *Townsend Letter for Doctors*, February/March 1994)

THE HAARP PROJECT

Some startling revelations came to light while researching the background of a military-sponsored project starting construction in Gakona, Alaska.

HAARP is the project's code-name, which stands for High-frequency Active Auroral Research Program. HAARP "will be used to understand, stimulate and control ionospheric processes that might alter the performance of communication and surveillance systems", according to a HAARP fact sheet.

Although the HAARP environmental impact statement claims negligible ionospheric impact with no change to climate, weather or ozone layer, there are many who are warning this project is a serious threat to our Earth's atmosphere.

Richard Williams, a physicist at Princeton, NJ, USA, has expressed serious concern for what he sees is irreversible damage to the atmosphere, and also to the fact that the results of the tests will be subject to secrecy rules.

An Arco company has the bid for construction of HAARP—Arco Power & Technologies, Inc. APTI holds a patent (#4,686,605) which matches closely the HAARP proposal dealing with transmitting extremely large amounts of radio-frequency energy into the ionosphere. It is evident that HAARP will at least test, if not fully implement, the patent capabilities.

The patent claims it has the following uses: "cause...total disruption of communications over a very large portion of the Earth; ...disrupt not only land-based communications, but also airborne and sea communications (both surface and subsurface); ...missile or aircraft destruction, deflection, or confusion... Weather modification...by altering solar absorption; ...ozone, nitrogen, etc., concentrations in the atmosphere could be artificially increased."

The HAARP project and the patent describe untested and risky scientific (military) experiments and research. Why are the people of Alaska being lulled into believing this is auroral research, when the only thing common with the aurora is the area above the Earth being altered?

(Source: *Anchorage Daily News*, 20 November 1993)

CONFLICT OF INTEREST?

GARY NULL: "I've been spending almost twenty years investigating the politics of cancer, along with Bob Houston and Peter Barry Chowka, and many others—Ralph Moss, Dan Greenberg. There have been many individuals who have tried to focus attention on WHY—in a country that claims that it is open to new ideas, claims that it is willing to fund research in innovative ways to look for an answer to both the cause and treatment for this deadly legacy—the reality is different from the rhetoric. And indeed, it has been a closed shop. The media has been woefully inadequate in covering both sides of the issue fairly and objectively. My concern is that the very organisations, the institutions, the individuals who are conducting the war on cancer are now the people who are conducting the war on AIDS. To give us an insider's view of what has happened in that war is Dr Ralph Moss. He is a researcher in the area of cancer politics, and is the author of *The Cancer Industry*. Welcome to our programme, Dr Moss."

DR RALPH MOSS: "Thank you, Gary."

GARY NULL: "Alright. Could you give us an idea of who the people are—the faces behind the cancer-AIDS community? What interconnections do they have? And how tight an 'old boys' network' is it?"

DR MOSS: "Well, it's very tight. As you know, I worked at Memorial Sloan-Kettering [in New York City], and so a lot of my research has focused on that centre, which is the largest private centre in the world for cancer research and treatment. What my research has shown is that many of the top directors (what they call "overseers") at Memorial Sloan-Kettering are also top directors at drug companies. For instance, Richard Furlow, who is the President of Bristol-Myers-Squibb and Director of the Pharmaceutical Manufacturers' Association, is a top official of Memorial Sloan-Kettering. Richard Gelb, who is the Chairman of the Board of Bristol-Myers-Squibb, is a Vice-Chairman of Memorial Sloan-Kettering. James D. Robinson, a Director of Bristol-Myers-Squibb, is on the Board, another Vice-President of Memorial Sloan-Kettering. The President of Memorial Sloan-Kettering Center, Paul Marx, is a Director of Pfizer [Pharmaceuticals]. And others [officials of Memorial Sloan-Kettering] are Directors of Bio-Technology General, Life Technologies, Merck [Pharmaceuticals], and so forth. And so what happens, in effect, is that you have sort of a closed circle of people who are, on the one hand, directors of the world's largest cancer centre; on the other hand, they are either officers or directors of the very companies that are producing the drugs which are used and advocated by these centres. This is not unique, by the way, to Memorial Sloan-Kettering. We see other kinds of deals being worked at Dana Farber Cancer Center and at other cancer centres around the country. There are many, many ways that the drug industry influences the direction of cancer research, and of AIDS research. You have to look at it from an economic point of view. The kinds of substances that you have been talking about [advocating] for twenty-five years, and that I've been talking about for many years, are basically natural substances. Most of them are nutritional in origin, or plant or animal in origin. By their very nature, these are very difficult, if not impossible to patent. So if you want to patent a substance, you'd better look to the synthetic drugs—the chemicals. And these chemicals, by their very nature, are foreign to the human body. They're novel compounds that have never been adapted to in the long years of evolution. And so, consequently, they're highly TOXIC. Those are the drugs that are patentable—that are profitable. Someone close to you may now, or in the future, be fighting for their life against cancer, the dreaded scourge of modern societies. They will then need to exercise their RIGHT to explore the untold side of the cancer story—the side which the drug INDUSTRY, the medical INDUSTRY and the mass media INDUSTRY would not want cancer victims to know about."

Though written as fiction, *Mike-
Alpha-Delta-3* is based on fact.

Otto Jewell lay strapped to the spotless white operating table while special operations technicians checked the electrodes on his scalp, and adjusted the two high-resolution lenses mounted directly above his head, designed to reflect images from the visual-input projector at the foot of the operating table directly onto the retina of each eye. On each side of Otto's head, two extra-low-frequency generators built into special headphones pulsed slowly and smoothly, enveloping both hemispheres of his brain with high-intensity electromagnetic fields.

Off to one side of the room was located the ELF generator control console, and a sophisticated electroencephalograph (EEG) linked to four green computer screens, each displaying one of Otto's four brain frequency groups: Alpha, Beta, Theta and Delta. As the generators pulsed slowly, the delta screen showed a brilliant green trace while the other three remained blank, apart from an occasional brief green 'spike' on the alpha screen. Directly beneath the four green screens a larger colour screen was on standby, ready to repeat all data relayed to the retina of Otto's eyes by the visual-input projector.

To the left of the computer bank stood a standard medical array, monitoring Otto's vital signs including respiration, pulse and skin conductivity. All was well in The Terrorist Factory: Otto was sleeping like a baby and programming could continue as soon as the staff were ready.

CIA controller Julia Long nodded to the others and walked out of the climate-controlled operating room into the blazing hot Moroccan sunshine. Although it was still early in April 1984, the sun beat down remorselessly and Julia thought again how unfair it was that the 'special access' facility had to be sited in the middle of Morocco—a country she personally found far too backward for her tastes. Unfortunately there was little choice as the US Congress had banned experiments on human targets back in 1973, at which point Special Operations had secretly moved the facility to Beirut in the Lebanon. She smiled bitterly to herself. Beirut had been wonderful, and ideally sited until the Russian military had blown more than two hundred US marines apart with a pair of special bombs.

Beirut was also an ideal launching point for her more normal 'clients': Arabs, including Palestinian refugees with a military background, programmed to believe they were operating under the direct orders of the PLO as they bombed their way across Europe, creating mayhem and fanning blind hatred against the nations of the Middle East. Most of the 'patriotic PLO terrorists' were killed during their missions of course, and those who survived could not provide their interrogators with any information at all, even under intense torture. US techniques in manufacturing electro-hypnotic dual personalities had been developed over a thirty-year period and were the very best, totally resistant to expert probing by anyone up to and including the Russian KGB.

It had never occurred to Julia Long that what she was doing was wrong. To her, the end justified the means entirely when spreading the doctrine of CIA 'democracy' across the globe. If a few dozen or a few hundred people had to die in front of television cameras in order to manipulate public opinion, then so be it. Julia was in the business of deliberately generating public anger by staging horrific, obscene operations that shocked the public via the television screen. After seeing bloodied, mangled bodies attributed to the PLO, Shining Path or whichever group was selected by the CIA as the 'culprit' for the atrocity of the day, the public was happy to

cheer the US bombers which they proceeded to blow the 'terrorists' and their wives and children off the face of the Earth. The fact no one would have died at all without the intervention of her small deadly Special Operations group was of no concern. For Julia, the world was run by CIA covert operations, and nothing else was of consequence.

As Julia sat in the hot sunshine smoking a cigarette, she thought briefly of Otto. It was nearly ten years since one of the facility's clients had been subjected to such an intense programme although the rationale was inescapable: as an Englishman, Otto had to be word-perfect in every way, in the event he was captured and interrogated during the special mission planned for him in the West End of London.

It was one thing interrogating an Arab who was 'obviously' PLO; quite another interrogating an Englishman with a high-profile professional oil background. British Intelligence would pull out all the stops and try especially hard to break Otto if he were taken alive during or after the mission.

A little grimly, Julia cast a sidelong glance at the smoky Atlas Mountains in the background as she crushed the cigarette under her boot. She would allow no mistakes with Otto: not one. As she opened the door of the operating room, cool air controlled at exactly 68 degrees Fahrenheit swept over her. Taking her seat at the control console and donning a set of headphones, Julia turned with long familiarity and moved two sliding controls. Immediately the green trace on the delta screen started to diminish and the alpha screen came alive slowly with a full-length trace instead of the intermittent spikes.

As Otto started to show signs of stirring, Julia flicked a switch across to the 'binaural' position and the electromagnetic fields were thrown out of synchronisation, flooding Otto's left and right brain hemispheres with fractionally different frequencies. The effect on Otto was to force his brain to try and 'match' the continually shifting frequencies. Unable to do so, his brain became entrained by the alternating beat. In less than ten seconds, Otto was in a full-blown electromagnetic hypnotic trance.

With high technology at its disposal, Special Operations had not used "You are feeling sleepy..." hypnotic techniques for years, though a large team of tame, well-funded academics was held in reserve to assure the gullible public that hypnosis was "quite safe" and "could not be used to make a person act against his own personal moral code". Recalling the tame academics, Julia smiled a slow, sardonic smile: all Special Operations had to do was point a professor at the public, and his hurriedly-composed excuses were instantly accepted without question by citizens and media alike.

Julia swung around on her chair and spoke briefly to the team psychiatrist by the operating table: "I need maximum pupil dilation five minutes from now." With a mute nod, the heavy-set bearded psychiatrist turned to the drip leading into Otto's left forearm and waited as the drug slowly flowed into his vein. The powerful hypnotic drug rapidly reinforced Otto's trance state while a 'cocktail' derived from curare limited the movement of his eyelids. Nodding with satisfaction, the psychiatrist slowly started to administer atropine.

As the atropine started to take effect, the pupils of Otto's eyes grew steadily larger despite the intense overhead lighting and the eye's natural inclination to shut out light under such circumstances. The visual-input projector now had direct and unrestricted access to the retina of each of Otto's eyes. Julia spoke clearly into a special boom microphone positioned less than an inch away from her lips:

"Okay, Otto, I am going to take you back to 1970 when you were flying over Oman. Do you remember the mission we talked about before, when your helicopter was covering the fighter-bombers attacking the fort occupied by Yemeni terrorists?"

"Yes," Otto replied tonelessly without moving a muscle.

"Right. You are there again in the cockpit just before the fighters start their attack run. Everything is so real, Otto, so very real. Start flying the mission from there. Remember Otto, remember everything—the sight, the sound, the smells and the vibration of the helicopter."

Otto looked around at the jagged edges of the mountains

...Otto had to be word-perfect in every way, in the event he was captured and interrogated during the special mission planned for him in the West End of London.

below the helicopter and then back up at the horizon, before spotting the two Hawker Hunter ground-attack fighters moving in fast over the desert, sunlight flashing from their plexiglass cockpit canopies as they turned to line up for the attack run. Swiftly but smoothly, Otto climbed out of the helicopter left-hand pilot's seat and made his way back to the starboard door. With one deft movement he swung the heavy machine-gun mount outwards and locked it in place. Still watching the Hunters out of the corner of his eye, he fed the leading end of a 200-round belt of glittering brass shells into

the machine-gun breech. Every third shell was a red-tipped tracer round, designed to aid accuracy when firing at ground targets. Cocking the weapon, Otto started searching the ground below for signs of movement at the rear of the fort as the Hunters levelled their wings and flipped out their belly air-brakes to reduce speed to 450 miles an hour.

While he watched, Otto checked the clip of his Browning 9-mm automatic pistol, then patted the pocket of his flying suit to check his two 'special' 9-mm rounds were safe. If the helicopter was hit by ground fire and brought down in the mountains, the crew's handling by the Chinese-trained Yemeni terrorists was pre-ordained: without ceremony their testicles would be slashed off with a carved dagger, then sewn into their mouths while they still lived. If an airman panicked on the ground and emptied the clip of his Browning too fast, the two 'special' rounds were there with which to blow his own brains out if he had time. Two rounds, not one, because the first might misfire...

A small stream of humans was already leaving the rear door of the fort as the first Hunter fired its salvo of high explosive rockets towards the front walls. With soundless flashes and clouds of smoke, the rockets burst slightly to the left of the fort with only three hitting the main structure. Cursing over his radio, the leader pulled out of his attack dive while his number two fired a second salvo straight into the fort itself. Otto's helicopter plummeted down towards the dark valleys like a falcon, as both Hunters swooped again to strafe what was left of the fort with their four 30-millimetre cannons.

Below Otto's helicopter the terrorists leaving the fort had seen his approach, and three stopped briefly to fire ragged bursts of automatic fire from their Chinese-made AK47 assault rifles. Otto swivelled the heavy machine-gun, allowed for aim-off and lightly tapped the trigger twice, firing two rapid three-round bursts to sight the weapon. The two red tracers smashed into the rock face slightly in front of the terrorists 500 yards away in the valley. Shifting the machine-gun fractionally, Otto fired three five-round bursts in rapid succession. As the machine-gun shuddered violently in the helicopter, all three terrorists were knocked spinning backwards against the rock face. Ignoring the empty shell cases and black belt-links being ejected into the helicopter slipstream, Otto continued firing carefully spaced five-round bursts, until interrupted by Julia Long:

"Otto, report. Otto, report your current activity!"

"Air-to-ground suppressive fire."

"Good, Otto, very good! Listen carefully to my voice, listen carefully to my voice. I am relaying a new assignment to you from headquarters. You have been requested on an exchange programme with Special Operations in Morocco. The security classification is Cosmic International, and you are promoted to the rank of lieutenant colonel. Open your eyes wide Otto, open your eyes wide. You are still flying on operations. You are still flying on operations..."

At the flick of a switch Julia Long turned on the projector at the foot of the operating table, the beam of which was promptly split and relayed directly to the retina of Otto's eyes by the accurate high-resolution lenses above his head. As new images started flickering from the projector, his detailed memories of the mountains of Oman started to shimmer and slowly dissolve, to be replaced by similar scenery passing more quickly.

When Julia increased the alpha field to maximum and decreased delta to minimum, Otto watched transfixed as his Northrop F5 fighter-bomber swooped low over the Western Sahara, firing a burst of 20-millimetre cannon shells at two enemy vehicles trying to escape behind a large sand dune. As the first vehicle exploded, Otto kicked off deflection and fired another burst at the second. With black flecks of soot from the cannon speckling his windshield, Otto pulled back viciously on the controls and slammed the twin throttles through the afterburner gate. For an instant in time, he looked down at the devastation below as green tracer shells weaved lazily around the wings of the F5.

The radio crackled in his headphones: "Good run, colonel, good run! Now get the hell out of there and return to base." Still strapped to the operating table, Otto watched obediently as he and his aircraft broke off the action and returned to base. The runway threshold rushed towards him and with a very real screech from its tyres the F5 settled gracefully on the tarmac, slowly decelerating and turning at the intersection to head towards the dispersal area and the waiting ground crew. A post-mission flood of adrenaline rushed through Otto, and Julia swiftly adjusted the alpha and delta fields to compensate for his rapidly increasing pulse rate and skin conductivity. After stabilising his vital signs, Julia Long turned again and spoke once more into her sensitive boom microphone:

"We will now conduct your debriefing, colonel. The mission was a complete success. Listen carefully to my voice, listen carefully to my voice. You are tired from your mission and will be allowed to sleep. When you wake again, you will have forgotten all life events after the age of 27 years. I repeat, when you wake you will have forgotten all life events after the age of 27 years. All you will remember, I repeat, all you will remember is that you are a lieutenant colonel on exchange duties with Special Operations, at a classified base in Morocco for multi-role training required for your mission. Congratulations, colonel! Enjoy your sleep."

As Julia moved her controls, the green trace on the delta-wave screen slowly increased at exactly the same rate as the alpha trace decreased. Within minutes Otto lay passively unconscious, his sleep disturbed only by intermittent green spikes on the alpha screen. Once more Julia turned to the psychiatrist waiting next to the operating table: "Put him out for about eight hours please, then have the technicians take him to his room. Put a discreet guard outside, but don't

worry; when Otto wakes again he will believe he really is a 27-year-old lieutenant colonel. He will remember nothing about his life beyond that point." Under his bushy eyebrows, the psychiatrist's eyes glittered slightly as he prepared the powerful tranquilliser and watched Julia Long as she strolled out of the room. Though in her forties, Julia was a very attractive woman capable of turning many male heads.

As Julia sat down at a table in the officers' mess and slowly stirred her cup of hot coffee, she thought back

"When you wake again you will have forgotten all life events after the age of 27 years. I repeat, when you wake you will have forgotten all life events after the age of 27 years."

over the chain of events that had finally resulted in Otto being delivered to the 'special facility' in Morocco. Julia smiled a wan smile.

It was perhaps the height of irony that another Englishman, John Dwyer, had brought Otto to the attention of a retired American CIA operative in Salt Lake City, Utah. For years Dwyer had worked as a sub-contractor for the CIA's African desk, and thought Otto's qualifications might be of use to his masters at the Central Intelligence Agency.

After leaving the RAF in the early 'seventies, Otto had moved into the specialised field of oilfield drilling operations. He seemed to have a natural aptitude for that profession, because by 1980 he was operating as the top engineering troubleshooter for an American multinational corporation he had joined only three years earlier. At the time Dwyer called his retired CIA contact, Earl Haggard, Otto was troubleshooting some oil wells in the Rocky Mountains, due east of Salt Lake City.

Discreet CIA enquiries revealed Otto spent much of his spare time at a rifle range near his home, so an 'accidental' meeting was arranged. Earl Haggard, a veteran of the notorious *Phoenix* psychological operation in Laos, turned up at the range and casually befriended Otto. As the weeks rolled by, Earl became convinced Otto Jewell could be of great use to the Agency. As a top troubleshooter in the oilfield service industry, Otto had immediate and unquestioned access to almost any country in the world. His strong military background was also in his favour, as were his demonstrated lethal skills as a marksman with pistols, rifles and automatic weapons.

The question of how or where Otto might best be used by the CIA was none of Earl's concern however, so after sending a long, detailed assessment of Otto's potential to Langley Headquarters in Virginia, he returned to his favourite golf course and forgot all about the Englishman.

CIA headquarters in Langley showed immediate interest. It was not every day that an Englishman with Otto's qualifications was brought to the attention of its intelligence analysts—one of whom noted Otto had spent much time in Middle Eastern countries, before carefully circling the single word 'LIBYA' with a bold stroke of his red pen. Otto's background pointed to his obvious use on covert missions under the aegis of Special Operations. Within a week, Otto Jewell's file was hand-carried by special courier to a small low-key CIA facility located in New Orleans, Louisiana, where it was placed in the 'in' tray of one Gordon Nobel. From that point forward, only paper files would be kept on Otto: computers were far too vulnerable to researchers leaning on the CIA under the Freedom of Information Act.

Julia Long moved uneasily on her chair in the officers' mess as she thought about Nobel, the man legend said coordinated the assassination of President John F. Kennedy in Dallas. Nobel was an animal: a known CIA heavy who took considerable pleasure in breaking limbs and, where necessary, shooting people through the back of the head with a heavy-calibre pistol. Most people in Special Operations were afraid of him and literally jumped to obey his every command. Julia was no exception and had all but sat rigidly to attention when he called her during 1983.

"Julia, hi!" The voice was deceptively soft when Gordon Nobel spoke on the secure international landline from New Orleans to Morocco. "Listen, I have a new client for you: an oilman with a good, solid military background. Initially we intend to use him on a tripartite drilling operation in West Bengal, then we'll get around to his special mission a little later."

"Fine, Gordon, where is he now?"

"We just had one of Howard Hughes' subsidiary companies

hire him as project engineer for a drilling operation near Calcutta. It's an interesting job: the Russians are helping the Indians to drill a deep oil and gas well in the Ganges delta, and our man is going in there to help them drill it with an advanced American fluid system. Or at least he *thinks* he's going to help them. The whole thing is basically a cover for the special mission he'll go on later, but he doesn't know that. We think it's a hell of a deal. We can really screw those Russian and Indian Commie bastards at the same time!"

Julia Long listened nervously to the cold soft voice hissing on the scrambled secure landline, then suddenly started when she realised Nobel had stopped speaking: "Fine, Gordon, fine. What do you want from my end?"

"Take your time, Julia. Have a couple of weeks' holiday, then fly to Dakar in Bangladesh. We'll arrange diplomatic cover for you and attach you to the local US aid team. From there you can go in and out of Calcutta as a diplomatic commuter. Your contact

will be Louis McCaul at our local Calcutta consulate. He's in deep cover and there are no known documented links between him and the CIA or Special Operations. Louis will arrange for your special equipment to be carried in the diplomatic mail bag. The name of your new client is Otto Jewell, and he'll be staying at the Oberoi Grand Hotel. We've bought a couple of the hotel executives, so access to Otto's room will not be a problem. Louis will arrange all that. Okay so far?"

Julia thought for a few seconds. "Okay, Gordon. What do you want me to do with this Otto Jewell? In other words, what mission are we preparing him for exactly? I want to get the procedures right."

"On this mission we operate 'need to know', Julia. All you need to know at this stage is that you spend the first month or so observing Otto from a distance. Watch his behaviour patterns carefully. We'll be doing our bit by screwing the Commies out at his rig site, so Otto will be under plenty of stress trying to figure out what the hell is going on. When you get word from me via Louis, I want you to start building a shallow 'decoy' hypnotic level—not too easy to break, but not too hard either. Have your Marine technicians rough him up under hypnosis and threaten his children—you know, the usual things. Make it as nasty as you can Julia, because if he's taken alive on the real mission early next year, that is all, I repeat, *all* that any interrogator is going to sweat out of him: the decoy level you develop in Calcutta. You'll get more orders later."

Coming back to her senses, Julia Long finished her cup of coffee in the officers' mess, then strolled through the searing noonday Moroccan heat towards her room. Though the conversation had taken place nearly nine months before, the memory of Nobel's voice still had the capacity to make her feel afraid. Lying down on her bed, Julia fell into a deep sleep.

And as she slept, she dreamed a dream. Suddenly Julia Long was back amid the chaos and noise of Calcutta, setting up her equipment in Otto's palatial room at the five-star Oberoi Grand Hotel. ∞

Julia turned on the projector at the foot of the operating table, the beam of which was split and relayed directly to the retina of Otto's eyes by the accurate high-resolution lenses above his head.

IN SEARCH OF ANCIENT SECRETS

**Are these
mysterious
rock carvings
prophetic
evidence of
visitors from a
bygone era?**

Australia

The past several years I have been researching a film project called *Missing Links*, which has led me into close association with certain Aboriginal Elders who had decided to share secret knowledge about Earth energies that has a great bearing on the present state of the planet.

The *Missing Links* project became a quest into ancient knowledge systems that has us tracking the 'Power Places' on the Earth's biomagnetic energy Grid, and talking to elders and shamans to collect the jigsaw puzzle of lost knowledge relating to this unique energy system.

All over the world we find the remains of pyramids and temples sprawled across the landscape like some ancient scientific instrument, placed on a precise geometric Grid pattern worldwide. This invisible energy web also ties in with known areas of anomalies in gravity and space-time, like the Bermuda Triangle, the Four Corners area in Nevada, Maralinga in South Australia, etc.

It is also worth remarking that modern Grid researchers, like Bruce Cathie in New Zealand, discovered the Earth-field 'Grid' by plotting the flight paths of unidentified flying objects over his country. But especially interesting is the occurrence of intriguing archaeological sites precisely placed on this Grid, indicating it was somehow central to ancient knowledge systems and a possible high civilisation in pre-history.

Bruce Cathie and other Grid researchers quickly pointed to the Giza pyramid and other famous historical sites that were precisely positioned on the world Grid map. I was immediately stirred to extrapolate the world Grid maps of Cathie and Becker-Hagens, to local Power Places I was learning about from my Aboriginal teachers and comparing with research into ancient mysteries.

I was not completely surprised to find that the Grid pattern accurately marked some of the local Power Places on the Grid intersection points—places like the Thora Valley near Bellingen, Mount Warning on the border of northern New South Wales, Pine Gap military base (among others), Ayers Rock, and so on. When I attempted to publish such a local Grid map in the magazine *Maggie's Farm* some years ago, I was stopped by Aboriginal Elders who came to say that the map revealed all their key secret sites.

This triggered an unfolding of the 'secret knowledge', because it was obvious that the Earth's energies had taken a serious assault and were in near-fatal disarray because of nuclear testing and the high-tech mining of the crucial Power Places.

My Aboriginal teachers relate the extraordinary tale of their origins as free-living 'Light Beings' beyond this dimension, who materialised onto a Paradise World that was somehow corrupted and destroyed by the 'Dark Forces'. They say they arrived here from their destroyed homeland in the stars as Seven Tribes. They immediately set about building a system of 'pyramids' encircling the world, that generated an energy aura to protect and energise the planet, "so that what happened before would not happen again".

Despite the creation of a remarkable world culture that used some kind of light and sound technology, this planet was also corrupted. The world civilisation of that time destroyed itself by seriously damaging the energy Grid, blowing the Earth off its axis, so that the poles iced up and we lost the worldwide temperate climate of legend.

According to the geological evidence of huge deposits of manganese, containing human and animal bones, spread across the huge mountain chain under the Pacific Ocean that conjoins Easter Island, Hawaii, etc., we have a carbon dating of 27,000 years since the sub-continent of the Pacific tectonic plate collapsed. Other evidence suggests the sudden demise of a large land mass in the Atlantic Ocean only a few thousand years later.

So, following a synchronistic trail, we began to explore the Grid locally, looking for missing links. As my researcher friend Paul Cadwallader remarks, "There are temples and ancient artefacts everywhere else in the world; why not Australia?" In fact, it was Paul Cadwallader's work that led us to the extraordinary ancient carvings we found in the South Australian desert at Grid Point 44 (so-called)—as reported in a previous issue of NEXUS [vol. 2, no. 13].

The non-Aboriginal writing and hieroglyphs he found, carbon dated at forty thousand years, displayed the pilgrimage of other ancient cultures to this major Power Place on the Grid, that used writing forms tracing back to the Mother culture through Vedic, Mayan, Easter Island, etc.

As in other parts of the world the ancient archaeological evidence, as well as the local indigenous people, displayed some kind of working knowledge of the Grid and world Power Places. Stone circles and standing stones litter the Australian countryside, as much as England and Europe, marking the interconnecting energy pathways that undulate snake-like through the landscape. Local researchers can locate such structures in the forest using simple dowsing rods. Aboriginal shamans smear their hands with metallic-oxide red ochre, to feel the invisible flows that define special energy points, portals and sacred places.

Across Australia we have persistent legends and tales of strange and magical happenings at local Power Places on the Grid, from the legendary appearance of sky-beings to contemporary UFO reports. And stories of instantaneous travel down the Song Lines abound in shamanic traditions worldwide. On line with these goings-on, my researcher friend Ray Stark introduced me to "David", a white man who was custodian of a very unusual site in the Hunter Valley, about 100 km north of Sydney.

David was very much into ancient knowledge. He was a practicing naturopath who, coincidentally, like myself, had been an apprentice to an Elder of the Bundjalung Tribe for ten years. David's teacher had also made him aware of the damaged Earth energy Grid and special Power Places that were the 'Keys' to the whole system. We had common links.

David spoke of having found some Egyptian carvings in the coastal forest near Gosford, that he felt sure we would find significant. He had known of the site for several years—it was originally discovered by a bush walker looking for his

lost dog which had crawled up a chute hole into the cave-like structure. It all sounded a bit too incredible.

We were definitely on the case for archaeological anomalies, but a clear example of Egyptian hieroglyphs sounded too good to be true. Yet, over a few years we had collected in our files some remarkable examples of odd Egyptian artefacts turning up in Australia. These range from the finding of a statue of the Egyptian god Thoth near a pyramidal hill in Gympie, south-east Queensland, by Rex Gilroy in the early '70s; and two cartouches of the Egyptian Pharaoh Ramses I, found in Arnhem Land and northern Queensland early in the century. I have even photographed an Egyptian identity amulet, found in Kyogle, northern New South Wales, and dated at 5,000 years by the Department of Mines.

David offered to meet us and take our camera team to the forest location. Having trekked to more remote parts of Australia, it seemed almost a luxury to travel only a couple of hours from our base in the Blue Mountains. Like some cheap adventure novel, we arranged to meet David early one morning at a garage off the northern freeway. He led us into the national park and off onto a bush track where we were swerving to avoid lizards and large potholes in the dust haze of the lead car. We pulled off the track a few kilometres into the forest and unpacked our camera gear for the trek up onto the ridges. David had come in a buoyant mood, wearing his American Indian Eagle t-shirt. He was in 'teacher mode' and obviously very keen to tell us what background he could—especially concerning Aboriginal knowledge and protocols.

According to David, it was not exactly a cave we

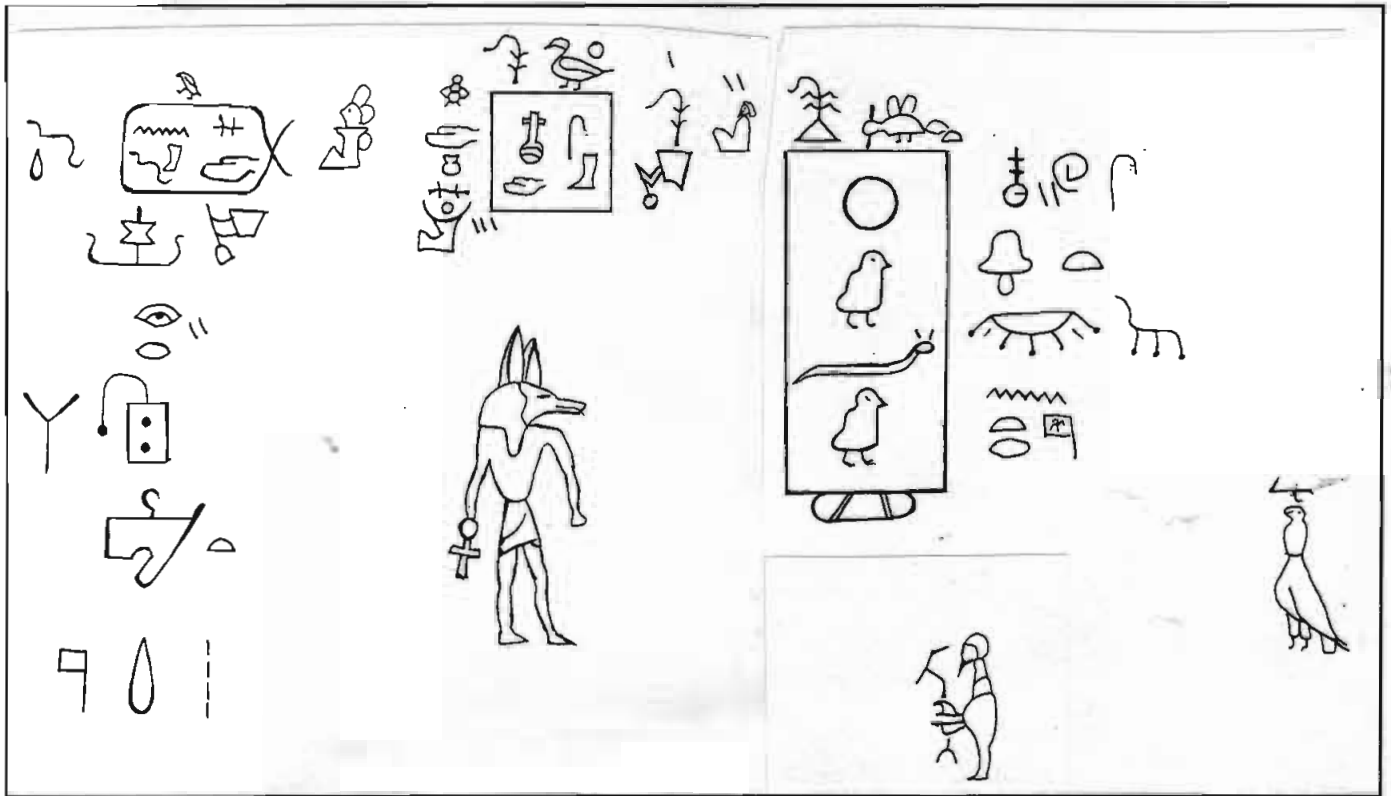

were climbing to see, but more of a 'crypt' roofed-in with large boulders. The more he described, the more enigmatic it sounded. He said there were other special Aboriginal sites in the area, including a sacred cave with animal carvings only a half-hour's walk from where we had parked the cars. The ancient carvings we were going to see were significant because they were non-Aboriginal.

It was a relatively short walk and climb to an area of rubble below a ridge, that looked like a landslide from the cliffs above. The landscape shifted sharply from coastal forest to a cluster of cracked and broken sandstone rock formations, covered in moss and lichen. After negotiating the ridge with our camera gear, we found ourselves confronted by huge sandstone boulders with a cave-like mouth.

"This is it!" said David. "You climb through here." And he disappeared up a rock chute. With mounting excitement

The clearly defined rock carving of Anubis. Photo: Paul White

we could barely control ourselves to shoot a location shot of the cave mouth, before climbing up the narrow rock gap with the camera in hand. Up through the chute we found ourselves in a narrow hallway of two flat facing walls made of a giant rock shelf, split neatly in two. The far end of this natural hallway was roofed in with a large flat slab of rock.

Almost immediately that we emerged into the rock cleft, we could see pyramidal designs, eyes and strange glyphs on the very weathered sandstone wall that faced us. Some of the carvings were so weather-worn as to be barely visible. Then, one of the crew shouted from further up the cleft: "Come and look at this! You won't believe it!" I turned on the video camera and walked the last short distance to the top of the vault. Turning the camera on the wall, there was a half life-size carving of the Egyptian god Anubis!

Anubis, guardian of the underworld, complete with wolf ears and snout, in the striped skirt, holding the Ankh, symbol of eternal life. This was certainly one of the wildest rock carvings I had ever seen! And as I scanned the wall around this haunting figure, I was stunned by the sheer volume of hieroglyphic writing in symmetrical rows.

This was no quick "Hi, we were here" inscription, as reported by other field researchers who have found single carvings and glyphic signatures around old coastal mining sites. The entire wall was covered with a phonetic script. Even to the uninitiated, this was clearly Egyptian writing, with many universally recognised symbols, ranging through ankhs, sphinxes, scarabs, birds and pyramids—including complete cartouche panels, naming the reigning Pharaoh of that time period as Khufu, or Cheops, circa 2,600 BC.

I had been prepared for a few Egyptian characters and had been thinking about the giant Eye of Horus I had filmed in the desert the previous year—but nothing like this! We counted well over 250 characters across the two facing walls. There was obviously a full-on story to be told. Either this was a most extraordinary ancient time-capsule or an elaborate

fraud.

David was already beginning to unfold the tale of what he knew about the glyphs and the site in general. I had to film some of what he was telling the others—he only had limited time—but I was in an extremely surreal state of mind, anxiously trying to decide if all this was real. I moved up and down the rock cleft, scanning the hieroglyphs with eye and camera, zooming in on particular symbols high up the wall and gingerly fingering some of those I could reach.

I'm not the most psychic of people, but I got a strong feeling from the carvings I touched. Especially a pyramid with a deep hole in the centre of it, two-thirds down. There were certainly some strong vibes at this site, and David informed us it was right on one of the big energy meridians that radiated out from the big NSW Power Place some distance inland, called "The Meeting of The Tribes".

Despite my astonishment, what had initially bothered me was the unusually good condition of some of the carvings. They had certainly been done with great precision and workmanship, with carefully inclined chiselling so as not to crumble the sandstone. Plus, you would need a very advanced education in writing phonetic Egyptian of a style about four or five thousand years old. But some of the carvings didn't seem time-worn enough.

Then I realised the carvings were partially roofed in by a huge flat rock slab placed across the top of the rock fissure. The roof had collapsed some time in the past with a landslide from the cliff above.

The best preserved carvings, therefore, were under the still-intact portion of the roof, gradually deteriorating the further you went down the walls that had been longest exposed to the weather. The glyphs at the open bottom end of the vault were very badly weathered, which tended to authenticate them a great deal. When I scouted around the rocks outside the entrance, I found a handful of Egyptian glyphs that were fully weather-exposed and so badly worn as to be barely dis-

Pages 18-19 - "The Gosford Glyphs":
 Schematic reproduction of the hieroglyphic symbols found in the Hunter Valley, NSW. These pictures have been reproduced in the same order and similar scale as found at the site, with the hope that some readers may be able to decipher the message of these carvings. We welcome your feedback.

construed to describe the classic Shamanic Path of Enlightenment.

We were particularly struck by a hieroglyphic set that finished with the stark image of a bearded Egyptian figure floating above a couch. This is preceded by the glyphs for God, above a pyramid next to a temple, and glyphs that read: "My Name Lives Forever". As a phonetic script, it could even be some kind of reference to intoning the Name of God to attain everlasting life.

I sat down in the 'crypt' with our guide David, to warm into interview mode. He explained how the site was discovered by a man and his dog, and studied by university academics several years ago, who covered it up and disappeared the files. He was now in touch with a small group of discreet researchers who hoped to complete translation of the writing soon. He said they have so far determined that it's some kind of prophecy, addressed to the people of a future time, who faced

blood and mass destruction if they didn't follow the path of The One True God.

David's Aboriginal teachers had told him about the energy Grid that spread like a spider's web across the country, and the special energies found at different places. David entertained the curious notion that the site could be a 'time tunnel' to Peru or wherever. A pretty wild idea on the surface, but shamanic tradition worldwide, especially Aboriginal, speaks of instantaneous travel along the Song Lines between the Power Places.

Interesting to note that the god Anubis, the largest single carving at the front of the hieroglyphs, was known in Egyptian as the "Opener of The Ways" and "Guardian of the Doors of the Underworld". Anubis was also associated with the "dog-star" Sirius, which was perceived by the Egyptians as a portal or gateway to other dimensions.

David spoke about the 'collapsed cave', a deep rock fissure

cernible at all.

I had now seen enough to be impressed by the apparent antiquity of the hieroglyphs. If it was a hoax, it was very impressive anyway. The education, the skill and the work involved in doing such a thing was considerable. It would take an academically trained specialist to translate the complete message, but other researchers could decode well-known words and phrases by reference to available source material.

I was unexpectedly familiar with many Egyptian symbols and glyphs, having created a full 'Egyptian range' in my younger screen-printing days and had reproduced some of the ideograms countless times. What could be readily gleaned seemed quite remarkable, with references to magic and high spiritual knowledge. There was the recurring symbol of the One God (Neter) glyphs of winged beings and other seemingly spiritual and transcendent image sequences, that could be

full of rubble at the front end of the hallway. He said his small group were about to excavate the niche, in case something was hidden inside.

There were also some unusual glyphs and designs that didn't seem Egyptian at all. Examples of early Hebrew appeared in a few places on the wall, including a large pyramid design with what looks like Hebrew 'flame letters' inside it. Another interesting anomaly was the ancient cross inside a circle design, associated with the submerged Pacific Motherland in the James Churchward books. Could this have been some strange mixture of ancient priests, exploring the world in the early days of Egypt, perhaps even following ancient records in search of the Lost Motherland?

Because of my work tracking archaeological anomalies, I was struck by the similarity of certain symbols here, and those I had filmed at the country's central Grid point in the South Australian desert. One of my research themes is the ongoing search for the ancient Mother Tongue—the sacred DNA language that existed before the big disaster in the ancient past.

One glyph in particular was of a small three-ringed figure holding something in one arm—a very specific language symbol that turns up around the world. My researcher friend, Paul Cadwallader, has tracked it through Easter Island script, Mayan, Egyptian and early Chinese. It identifies a place of power or high spiritual learning. It roughly translates as: "Person or Priest of High Degree who Speaks with the Straightness of an Arrow".

Put alongside the research I've been tracking about the Earth Grid, the Lost Motherland, and what I call the 'Ancient Harmonic Science', there are some fascinating clues and correlates here for a 1990s researcher. Referencing advanced modern source material like Dr Hurtak's *Keys Of Enoch*, Dan Winter's Sacred Alphabet material, and an array of research into consciousness and language married with metaphysical and shamanic understandings, we can adopt some interesting perspectives on these hieroglyphs.

The sacred language of the Egyptians, supposedly taught to them by Thoth Tehuti, a priest-scientist survivor of Atlantis, is an extremely sophisticated language of ideographic pictograms that operate multi-dimensionally on many levels of understanding. As well, they describe specific 'phonetic equations' for humans to intone precise sound frequency codes that had a tuning-fork style resonance effect on consciousness and matter. The Egyptian priesthoods maintained great secrecy around the Divine Names, which they understood as 'Vibrational Access Codes' to the energy-matter matrix, the holographic energy field we call the 'Grid'.

Nowadays, we are just beginning to understand the mind

and reality in terms of how holograms work, and we are making our first observations about Light oscillating through the patterns of tetrahedral geometry to create matter. The Earth's wrap-around biomagnetic energy field has been found to be a giant isododecahedron produced by tetrahedral geometry. And this invisible Grid is littered with pyramids and temple structures to mark the 144 Key Power Places, mirroring the 144 points of the human acupuncture meridians, and even Bruce Cathie's 144 harmonic of light. As above, so below.

Could the pyramid—the Tetrahedron—hold the secrets to a higher physics, the working of the universal energy field, as well as the keys for humans to rapidly evolve beyond their present state? There is even speculation that the original Mother Tongue, the ancient harmonic sacred language, could reactivate our DNA and achieve a qualitative transformation of the human form.

Given such understandings, it was especially amazing to encounter the large pyramid carving containing expressions of tetrahedral geometry in Hebrew characters, which accurately describe the energy forms generated by light, oscillating in a tetrahedron. This was next to the glyph for "Sekhem" (Vital Force).

Equally amazing were the phonetic expressions of the Divine Name to attain transcendent or higher evolutionary states, complete with a warning of what the lack of such knowledge could bring. So, we would seem to be dealing with the advanced knowledge of people who knew the secrets of the pyramid and, therefore, the pyramidal geometry of the Earth Grid and human life field.

Perhaps this group of ancient priest-scientists travelled what remained of the prehistoric Grid system to record their knowledge in a few remote locations for those who would come after—an enigmatic, 5,000-year-old time capsule. But are we spiritually sophisticated enough to decode such high ancient knowledge and can we understand their strange warning? Only time will tell... ∞

I faced a perfect globe, maybe a yard in diameter; it was transparent and filled with a colourless liquid gas. Suspended in the liquid was what appeared to be a plant, but what a plant! It was a fist-sized bulb, capped with a foliage of iridescent, moving shards of light. It was a Being of ethereal beauty; but far more than that, it was intelligent! "You are so wonderful." My silent projection of admiration came from me unwittingly.

"I am a Wonder-Neap. That is the closest translation possible. Would you like to journey with me?"

"I have dreamt about you so many times that I feel I know you. Each time I feel an incredible connection, but as I reach out to touch you, invariably I wake up."

"Or perhaps you fall asleep! Would you like to journey with me?"

"I would consider it a privilege."

The Wonder-Neap's foliage waved delicately in the liquid, while prisms of rainbow light danced within the globe. I had the sudden insight that this rainbow light was food for the wondrous plant, and that it was self-perpetuating in some form of natural, symbiotic relationship.

"You have dreamt of wanting to touch me, and you may now do so. But first, I will touch you."

For a brief moment, the Wonder-Neap opened its consciousness, metaphysically touching me, and an incredible wave of transcendent intelligence engulfed me. It was so far beyond my human experience that I was dazed, but any vague remnants in my conditioning that conferred intelligence to people and none to plants was totally annihilated.

In turn, I reached out my hand and touched the Wonder-Neap, and...

...everything changed, even the familiar Earth of my normal reality. As I gazed around, I realised that this was a very early era on a much younger Earth. Great swamps covered the land, with only the hills and ridges above water. It was cool, with no tall vegetation to be seen. Large flat, soft-leaved plants grew in abundant profusion in the shallow water and mud—mud that continuously oozed and bubbled as gases formed and escaped. There were a few animals to be seen, but they were generally of a reptilian shape, yet they also had a fishy look about them. Most were able to move efficiently in the water and on the land. Some seemed to be all teeth, long, sharp and formidable, while others were adapted for eating the lush plants. I saw nothing that had a thick, scaly skin or armour plating, or even any sign that such would develop. The animals had some resemblance to how one might imagine land sharks—not crocodiles—with the same lack of a definite skeleton, limbs or bones.

I got so involved in my observation of this incredible prehistoric Nature that I committed a careless oversight. A nearby toothy predator had been sliding through the shallow water toward a rather large plant-eating species. When it made a final rush, the wicked needle-teeth sinking into the gulping beast, a rapid, slithering, sliding, rolling, biting, hissing, heaving mass of prehistoric flesh and fury engulfed me. I was flattened, smashed down into the water, while a rage of bestial ferocity pressed me deeper and deeper into the oozing mud.

For long, horrendous moments I choked and gasped, the mud and muck dominating all inner knowing. I was lost in panic when a huge, heavy cartilaginous tail smashed into my head, and I sank into oblivion.

I opened my eyes to a brilliant blue sky that has also become extinct on Earth. It

had a colour and clarity of unbelievable depth. The Wonder-Neap hovered nearby, and if it was in the least concerned, I felt nothing. It emitted no emotions, no humour, no concern, nothing, yet I knew that it cared.

"A good way to learn a lesson."

And it was succinct! "What happened? How?"

"You forgot you are not physical."

It was true. I had forgotten I was not physical. I had been so rapidly overwhelmed during the struggle that I had jerked back into old physical reactions of fear, and for a while, they became my reality. Once I blacked out, my meta-physical Self resolved it, all physical illusions ending. A bit like life, I thought reflectively.

"Exactly! Good lesson."

"Did you know that would happen?" I asked.

Without replying, the Wonder-Neap hovered close, and everything changed again.

This was Earth of a later prehistoric time frame, with a climate and vegetation that left me gasping. I have experienced high humidity in the tropics, but this was like being in a sauna. The air was saturated heat, while the vegetation was beyond a botanist's wildest dreams. Where I stood, the landscape was dominated by very large cycads, plants with dark, lush, green fernlike foliage. Huge primitive trees grew in scattered groups, but I do not know whether they were massive tree cycads, tree ferns, or some type of palm unknown to me. There was no grass, nor any flowering plants other than the cycads and club moss. This grew in a dense profusion, covering all the soil between and around the cycads. It was a lush, moist, verdant green. Physically, I would have had difficulty walking more than a few yards, so abundant was the vegetation.

Two other things that surprised me were the smell and the noise. The smell was astonishing. I could smell the wet soil

and rotting vegetation as a pungent, overpowering odour of humus and decay. I liked it. It was the smell of a raw and pure Nature. I can only liken the noise to the sound of crickets and cicadas, except it was far louder than any I have ever heard physically. Despite my efforts to detect just one culprit, it was lost in the overall cacophony of sound. The club moss seethed with huge millipedes, centipedes and other insect life, while the cycads seemed to house the insects responsible for the noise.

**"You are perfectly safe,"
it projected silently.
I was puzzled by its words
until I saw the dinosaur.**

The Wonder-Neap hovered close by, floating with all the ease and grace of a helium-filled balloon. "You are perfectly safe," it projected silently. I was puzzled by its words until I saw the dinosaur. There is no way to describe the impact of such an awesome creature. I have stood in zoos admiring the elephants, impressed by their size, power and majesty. But compared with what confronted me, an elephant had all the impact of a mouse. This creature towered above me. It seemed impossible

that it could have moved this close without my hearing it, despite the background orchestra. Even more than its size, the impact came from its colossal presence.

I stared in mute awe. Although I now felt safe in my meta-physical state, the memory of my recent episode compelled me to take a few hasty steps back. Even the Wonder-Neap, which, I suspect, perceived life in a way that was far superior to vision, projected a feeling of awe. I was very relieved that the dinosaur was plainly vegetarian. It opened a vast mouth and cropped those huge, tough, four-metre-high cycads as easily as a cow crops grass. The thought of a carnivorous behemoth that could eat this way made me shudder. At a guess, this creature could have looked into the window on the third floor of a house, and its neck was not all that long, compared to its body. It was not without defence, for it was armour-plated, with a huge, knobby swelling on the end of its tail that was a very effective club. One swipe with that would smash a car flat! Surprisingly, it moved with none of the crashing blunder that its massive size would suggest. It had a definite grace of movement, and it made no sound above the din in the background. As it grazed, it disturbed small reptilian creatures that darted from the undergrowth, running on their hind legs with remarkable agility and speed. None were longer than about two yards, with some considerably smaller, but all had a mouthful of sharp teeth. I looked at the Wonder-Neap, perplexed. As fantastic as all this was, I knew there had to be a purpose. What was it?

The Wonder-Neap was clearly attuned to my thoughts, for at that moment it came closer. The globe very gently touched my light-body head, and my visual perception expanded and changed. I could now see the consciousness of the dinosaur. This was a shock. For such an immense creature, its consciousness was quite small, as though it were a misfit. I perceived consciousness as a shroud of illumination, completely independent of the body but in juxtaposition to it. When, at that moment, a

few more of the small reptilian creatures ran from beneath the cycads, I was further surprised to see that their consciousness was far larger in proportion than that of their giant cousin.

"Consciousness draws to its Self form through which to express. When form can no longer extrapolate a greater physical potential, consciousness withdraws." The words were from the Wonder-Neap, and with them came understanding. The huge dinosaurs had grown progressively larger and larger over many millions of years, reaching their physical limit. As their physical bulk was becoming less and less appropriate for survival, consciousness was withdrawing from their vast bodies. The consciousness of the fast, agile reptilian creatures was still developing, as their potential grew and flourished. I was witnessing the evolution of consciousness through physical form.

Suddenly, everything went horribly wrong. A searing bolt of pure energy flashed past us, and I caught a glimpse of some small Grey Beings standing on a cluster of nearby rocks. My mind a whirl, I dived for cover. What was happening? Was I vulnerable in my non-physical body? How could other Beings be here in prehistoric times?

I looked around for the Wonder-Neap. An envelope of shimmering light emanated from the globe, but it seemed agitated. It zoomed around in erratic circles for a few moments, moving at terrific speed; then I heard its silent words, "I will get help, you can be hurt."

When it took off, it vanished in a flash of light. I crouched down, completely at a loss. Another lightning bolt of energy lanced past me, and ducking down in the undergrowth I quickly changed my location. Was I the target, or was I simply in the way? So far, all the Beings I had encountered were benevolent. Were these hostile?

My attitude changed, and I took action. How or whether I could be injured in my light-body I had no idea, but I was never good at being passive. I needed to act. I had to find out what was happening and why.

Running in a fast crouch, I circled the rocks, coming up behind them. There were four humanoid Grey Beings, each standing about four feet tall. They were stout and pudgy, with muddy grey skins and a drab grey uniform. They did not feel nice, yet neither did they feel dangerous. I instinctively knew that they intended no serious harm, but were more like a group of bully-boys, and I lost my residue of fear. Their posture indicated that they were obviously arrogant, as they stood openly on the rocks as though impervious to anything I might do.

My earlier increased perception came to my aid, for I knew that I could tune into them, intuiting their intent. I remained behind them, keeping hidden, while they still faced the area I had vacated. Clever they might be, but intelligent?

As I focused on them, tuning in, an inner knowing unfolded. Although I was witnessing a prehistoric period, the "Grey Ones" are still with humanity to this day. I could not say I felt they were bad, any more than humanity is good, but their intent toward us is not for our benefit. Their energy felt strongly negative and, with a faint shock, I realised that they were able to project this negativity at people who had a similar focus. A person who focused on personal power and the

manipulation of others was potential prey for the Grey Ones. They are attracted to such people, helping them to satisfy their desires while feeding off the resulting psychic negativity. They are not out to take control of our affairs, but to covertly influence us toward our basest and most negative desires.

The Grey Ones know that humans are truly Beings of Light. Their purpose seems to be to divert us from focusing on this truth, for when we focus on our Lightness, they are powerfully repelled. Their real strength is in projecting the illusions of gain to be found in power, manipulation and wealth. And humanity is an easy prey. However, just as the Grey Ones focus on the fear and negativity in humanity, so, too, that focus suppresses their own greater potential.

On impulse, I tried an experiment. As powerfully as I could, I visualised Light and Love encompassing them. The effect was startling. Within moments, they looked agitated and uncomfortable. I found it easy to do this, for I felt no enmity or anger toward them. I imagined Light in copious clouds illuminating the area around them, and their agitation became acute.

Within moments, they hurried to a small, silvery grey, disc-shaped craft, entered through a small opening that vanished when they were all in, and took off vertically. The craft disappeared with an instant, stupendous speed that reverberated with the crack of thunder.

Only as I stood alone, all action finished, did I begin to wonder about the Wonder-Neap. I realised that the Wonder-Neap could have taken me from any danger in an instant. I knew the Grey Ones were thoroughly unpleasant, but had I been set up? Walking to the warm, slightly steaming rocks in the ultra-tropical heat, I awaited my strange, multidimensional friend.

Another craft materialised nearby. It did not come from the sky; it simply appeared. Not only that, it did not look as though it could fly, being a large, circular sphere with a hazy spin to it. I knew, clearly, that these were 'the good guys'. Simultaneously, the Wonder-Neap appeared, almost seeming to grow from the air before me, so silent and instantaneous was its arrival.

"You learn faster than anticipated."

The comment was simple enough, but from the Wonder-Neap it was rare praise. I felt good.

The spherical craft now dematerialised, revealing three Blue Beings who regarded me intently. They, too, were humanoid, slightly smaller than I was, with fine, delicate bodies. Their skin was a deep blue, yet it had a translucent clarity very unlike human skin. Whereas the Grey Ones radiated negative energy, to a far greater degree the Blues emanated love and a deep sensitivity.

One of the Blue Beings projected silently: "As you have surmised, you were never in danger. The situation was unexpected, but we utilised it to observe how you would respond. With intuition and intelligence, you acted commendably."

I felt pleased. "I'm amazed that a prehistoric period should

Within moments, they hurried to a small, silvery grey, disc-shaped craft, entered through a small opening that vanished when they were all in, and took off vertically.

A Secret History of the 20th Century

***A conspiracy
theory view of
the history of
the last one
hundred years.***

Extracted from the book
CASEBOOK ON ALTERNATIVE 3

by Jim Keith, © 1994

PO Box 20593
Sun Valley, NV 89433
USA

There is no question in my mind that there is a conspiracy, even a web of conspiracies running things (or attempting to run them) from the higher reaches of the global food-chain. Today, it is more a question of 'who', rather than 'if', and there are more than enough candidates to keep an army of muckrakers busy with their rakes for years.

In researching, one begins to see the outlines of an intersection of powers implementing plans nearly identical to *Alternative 3* and, as researcher Hawthorne Abendsen points out, for these control structures "nations are merely convenient fictions".

To begin to understand what may be a real *Alternative 3* plan to lock the population of Earth into ultimate control prior to the abandonment of the planet, we need to trace a number of individuals, incidents, ideologies and technologies, and then we will have only scratched the surface of possible connections. Nazis and the CIA; population breeding programmes and American old money; slave labour camps and electronic war; NASA and Antarctic bases: these are a few of the threads in the blood-red warp.

For reasons which hopefully will become apparent, I begin the search for *Alternative 3* at what might appear to be an arbitrary moment in history: with men, most of whom died a long time ago. As we trace the actions and connections of these men, the conspiratorial web will radiate outward, and perhaps begin to take on a definite and ominous pattern.

The tale is taken up shortly after the collapse of the Third Reich, when General Reinhard Gehlen, Nazi spymaster and Knight of Malta-to-be, began negotiations with Allen Dulles and the American OSS (Office of Strategic Services). Using Nazi intelligence networks as a hole-card to provide for his own survival and the survival of his huge spy network, Gehlen made a separate peace with Dulles, resulting in the clean grafting of Nazi spy apparatus to the American clandestine services. This was the birth of the CIA and part of a nexus of betrayal that continues to this day.

It is actually not so odd that Gehlen should have been able to forge ties with director Allen Dulles: Dulles' background is inextricably linked with Nazi and other elitist interests.

At the turn of the century the Dulles family, cousins of the Rockefellers, coming from a Southern slave-holding background and powerful international connections, was well-connected with international banking and German interests and, when they noticed them at all, supporters of eugenics programmes (i.e., selective breeding and extermination) for the lower classes. A personal philosophical statement of Allen's brother, John Foster Dulles, in 1911 illuminates the mindset and incidentally underlines a major theme of, or justification for, *Alternative 3*:

"Under natural conditions all species tend to increase with great rapidity. [After] a few generations the world would be literally crowded with life... There is a check, however... the limited capacity of the world to sustain life. As the numbers of a species increase, it becomes more and more difficult for each individual to find means of sustenance... some must perish, and what is known as the law of natural selection says that the ones who will perish will be the weakest. The strongest will survive..."

"With man, as with every other form of life, there is this same tendency for the birth rate to far exceed the death rate, with the inevitable result of an overcrowded population in which some must be eliminated. Who those eliminated are depends upon who are weakest and who are strongest in the competition which necessarily ensues.

"Biology tells us that it is only by means of this competition and elimination that progress is made. For the tendency of a race is to retrograde and it is only by eliminating the lower members that a higher average is maintained..." [emphases added].

Prior to World War I, the Dulles brothers were recruited into the US State Department by their uncle, Secretary of State Robert Lansing. Lansing was well-connected in banking and political circles, friend to the likes of William Howard Taft, Andrew Carnegie and Bernard Baruch. Lansing, a blatant Anglophile who took diction lessons in order to sound more British, was one of those Americans who used their power to virtually dictate to President Woodrow Wilson that the US enter into an alliance with England against Germany, and supervised a steady flow of American intelligence to British spy circles.

The assassination of Archduke Ferdinand, the heir to the throne of Austria, was the match that touched off the international conflagration of World War I. Notes of the military trial examining Cabrinovic, one of the Archduke's assassins, provide clues that have been little discussed in relation to the identity of the perpetrators:

President of the military court: "Tell me something more about the motives. Did you know, before deciding to attempt the assassination, that Tankosic and Cignovic were Freemasons? Had the fact that you and they were Freemasons an influence on your resolve?"

Cabrinovic: "Yes."

The President: "Did you receive from them the mission to carry out the assassination?"

Cabrinovic: "I received from no one the mission to carry out the assassination. Freemasonry had to do with it because it strengthened my intention. In Freemasonry it is permitted to kill. Ciganovic told me that the Freemasons had condemned the Archduke Franz Ferdinand to death more than a year before."

According to the notes of the trial, Ciganovic and Tankosic held higher positions in the Freemasonic hierarchy than Cabrinovic, and Ciganovic had informed Cabrinovic that the organisation had been unable to find anyone to carry out the assassination.

Count Czerin, a friend of the Archduke, relates in *Im-Welt-Krieg* that "The Archduke knew quite well that the risk of an attempt on his life was imminent. A year before the war he informed me that the Freemasons had resolved on his death."

Why would the Freemasons have been interested in the death of Archduke Ferdinand? Far from the innocuous ritual-based men's club that they are presented as in the mainstream media, Freemasonry has long been linked to international political manipulation, and has been alleged to be a conduit for the intentions of a number of elitist interests, including the House of Rothschild and their international banking connections.

Discussing an apparent plot to involve the United States in the European war, Commander Joseph Kenworthy of British Naval Intelligence reported: "*The Lusitania was deliberately sent at considerably reduced speed into an area where a U-boat was known to be waiting and with her escort withdrawn.*"

President Wilson is known to have concealed in the archives of the Treasury Department the bill of lading of the doomed Lusitania which proved it had been carrying contraband military supplies destined for Great Britain, putting the lie to the idea that the Lusitania was a non-military passenger vessel.

Banker Bernard Baruch controlled US business during World War I as Chairman of the War Industries Board, banker Eugene Meyer headed the War Finance Corporation, while banker Paul Warburg was in charge of the Federal Reserve. All three men were agents of the Rothschild banking conglomerate.

The "War to End All Wars" devoured thirteen million souls, and at its conclusion Allen and John Foster Dulles were recruited by President Wilson's powerful advisor, banking insider "Colonel" Edward House, future architect of Roosevelt's socialist-styled "New Deal". The Dulleses travelled to Europe to attend the Paris peace conference, meeting there with members of South African diamond magnate and Freemason Cecil Rhodes' secret Round Table group, founded in 1891.

Representing the interests of British aristocracy and Rothschild-front bankers such as the Warburgs, Schrodgers and Lazards, the Round Table promoted and continues to promote a New World Order based on Freemasonic/Illuminist ideas such as those held by Rhodes' mentor, John Ruskin. Ruskin in his turn is said to

have been influenced by Bavarian Illuminatus Adam Weishaupt and the Isis-occultism of Edward Bulwer-Lytton, the basis of the Scottish Rite of Freemasonry, the Theosophy of Madame Blavatsky's *Isis Unveiled*, the Isis-Urania Temple of Hermetic Students of the Golden Dawn, and the German Thule group which was to launch and provide key philosophic underpinning to the career of Adolf Hitler. The Round Table advocated, in clear reflection of Illuminist ideas (and still does), the destruction of all national sovereignties and surrender to an elitist ruling body, the prototype of the New World Order. The group was patterned, according to Rhodes, "on Masonic lines" with an inner "Circle of Initiates" including Rhodes, Lord Milner, future prime minister Arthur Balfour, and Lord Rothschild, whose banking cabal provides one of the most discernable influences upon the group.

"...*There grew up in the twentieth century, a power structure between London and New York which penetrated deeply into university life, the press, and the practice of foreign policy. In England the centre was the Round Table group, while in the United States it was J. P. Morgan and Company or its local branches in Boston, Philadelphia and Cleveland.*"

Inducted into the Round Table, the Dulles brothers became officers of the group's American branch, the Council on Foreign Relations (the British front group being the Royal

...There grew up in the twentieth century, a power structure between London and New York which penetrated deeply into university life, the press, and the practice of foreign policy."

Institute of International Affairs, known as "Chatham House"). Other members of the CFR-international banking axis included David Rockefeller, Averell Harriman (whose family was the creator of the Eugenics Records Office and the Eugenics Research Association, calling for fifty million Americans to be sterilised with the goal of perfecting the "Perfect Man" by 1980), the Astor family, Rothschild bankers Bernard Baruch and Paul Warburg (the latter hired by Kuhn, Loeb and Company at \$500,000 per year to promote the creation of a Federal Reserve Bank in the US), and other prominent members of the international dollar-aristocracy.

In 1910 a secret meeting of bankers at Jekyll Island, Georgia, finalised long-standing plans for the creation of a federal central bank in America, which was to be represented to the public as "free of Wall Street or any monopolistic interest"—quite the opposite of the truth. Introduced via the Aldrich Bill, the plan for the Federal Reserve Bank was initially rejected by Congress. When it was realised that the Republicans were too closely connected with banking interests in the public mind, it was decided that the concept would have to be introduced by the Democrats, and this was done, resulting in the Federal Reserve Act of 1913.

Speaking of the actions of the Round Table and their banking sponsors in the creation of the Federal Reserve, Dr Quigley wrote:

"The powers of financial capitalism had [a] far-reaching aim: nothing less than to create a world system of financial control in private hands able to dominate the political system of each country and the economy of the world as a whole. This system was to be controlled in a feudalistic fashion by the central banks of the world acting in concert, by secret agreements arrived at in frequent private meetings and conferences. The apex of the system was to be the Bank for International Settlements in Basel, Switzerland, a private bank owned and controlled by the world's central banks, which were themselves private corporations. Each central bank sought to dominate its government through its ability to control Treasury loans, to manipulate foreign exchanges, to influence the level of economic activity in the country, and to influence cooperative politicians by subsequent economic rewards in the business world."

The Rhodes group and its supporters were key in providing financing for the Russian revolution at the beginning of this century. As early as 1907, twenty million dollars was funnelled to Trotsky and Lenin, with additional large (but unreported) sums flowing from the bankers to the Communists over the next few years.

In 1918, a group of fifteen international financiers secretly travelled to Petrograd under cover of a Red Cross mission. Delegates to the All-Russian Congress were purchased to the tune of one million dollars in support of Freemason Aleksandr Kerensky, with additional financing provided for the Provisional Government and their successors, the Bolsheviks.

It is usually assumed that Capitalist and Communist interests are diametrically opposed in their aims, but over the

years the Round Table, the Rothschilds and their brethren have been happy to play cricket with Communists of various stripe and in a wide variety of settings, from Mao's China to Castro's Cuba, helping out with the odd multiple millions of dollars and pitting East-West interests against each other. I do not state this as an offhand condemnation of Communist philosophy, but to point out the strange seeming-contradiction of international super-capitalists supporting a system which is portrayed as their mortal enemy.

Professor Stuart Crane describes the mechanism as employed by the Rothschilds during the nineteenth century:

"If you will look back at every war in Europe...you will see that they always ended with the establishment of a 'balance of power'. With every reshuffling there was a balance of power in a new grouping around the House of Rothschild in England, France or Austria. They grouped nations so that if any king got out of line, a war would break out and the war would be decided by which way the financing went. Researching the debt positions of the warring nations will usually indicate who was to be punished."

By 1925 the Round Table had spread its organisation, via three front groups, to twenty countries. The influence of this group and their allies has, if anything, increased over the years, and every American President since Freemason and Rothschild relative Franklin Roosevelt has drawn major portions of their cabinets from the American offshoot CFR.

The CFR's current roster of more than 2,600 members (within the far larger international alliance) includes key representatives of almost all of the major corporations, foundations, financial organisations, communications conglomerates and think-tanks in the United States. At any given time, approximately half of the CFR are serving or have served in the US government. All three media-acknowledged candidates for the 1992 presidential race were linked to the

CFR, while the major 'non-establishment' candidate, Bo Gritz, tipped his hand to journalist Jay Katz when he slipped him a Freemasonic handshake at a survivalist convention.

Allen Dulles' star only continued to rise when, in 1920, he was appointed First Secretary of the American Embassy in Berlin. During the same period John Foster Dulles represented the international bankers in Germany, via the Bank of England and J. P. Morgan institutions. This was a time of intensive behind-the-scenes activity by British and American clandestine services in the promotion of Hitler and National Socialism, in itself a front for the occultist Thule Bund, to the fore in Germany. Thule and the associated Vril Society, were fraternally linked to English secret societies and (coincidentally?) based at least in part upon the writings of Freemason Edward Bulwer-Lytton, author of *Vril: The Power of the Coming Race*, the same man whose philosophy had fired John Ruskin and, through him, Cecil Rhodes.

On 20th March 1922, banker Hjalmar Schacht (later to hold the purse strings of the Third Reich as Finance Minister, and whose father had been co-director of the German branch of Equitable Life Assurance, owned by J. P. Morgan, a Rothschild confrère), sent his friend John Foster Dulles a proposal for Germany to receive a five-billion-mark loan to be

"... nothing less than to create a world system of financial control in private hands able to dominate the political system of each country and the economy of the world as a whole."

turned over to the central Reichsbank, thence turned over to newly-created German companies, with the stated purpose of making German war reparations possible. This was one reason that Hitler, despite his anti-Semitism, had a degree of popularity with the international bankers: he had promised to repay Germany's war debt "to the last pfennig". In addition to arranging funding for Germany, Dulles believed that, contrary to the dictates of the Allies, the country should be re-armed, and arranged covert munitions shipments through du Pont, clients of his law firm, Sullivan and Cromwell.

Over the next few years banker Schacht oversaw the entwining of German interests into massive international cartels, the most famous being the alliance of I. G. Farben chemicals with the Rockefellers' Standard Oil of New Jersey (i.e., Exxon), the formation of which included a \$30 million grant from the Rockefellers. The US War Department was later to state: "Without I. G.'s immense productive facilities, its intense research and vast international affiliations, Germany's prosecution of the war would have been unthinkable and impossible..." An examination of the sources of funding for I. G. would have been more to the point. By 1929, industry in Germany had been built up so that it was second only to the United States.

John Foster Dulles was elevated to the head of Sullivan and Cromwell, the legal firm representing the German cartels, and during 1934-35 his letters to German clients bore the jaunty salutation, "Heil Hitler!". Clients of Sullivan and Cromwell included I. G. Farben (which ran the slave factory at Auschwitz), major Hitler-backer Fritz Thyssen (who was to introduce Allen Dulles to Hitler), Gestapo General Kurt Von Schroeder and the Anglo-German Schroeder Bank, General Motors of Germany and other companies central to Germany's World War II effort. After the rise of Hitler's *Neuordnung* (the New Order), Dulles, representing banks and investment firms in the Rothschild-Round Table alliance, travelled to Germany to negotiate further American funding for *der Führer*. During this period, Mussolini's failing dictatorship was bailed out by loans from J. P. Morgan.

As far as Freemasonic President Franklin Roosevelt's allegiance, he drew much of his cabinet from the CFR, while his son-in-law, Curtis Dall, has stated succinctly what can be confirmed from numerous sources:

This was one reason that Hitler, despite his anti-Semitism, had a degree of popularity with the international bankers: he had promised to repay Germany's war debt "to the last pfennig".

"For a long time I felt that FDR had developed many thoughts and ideas that were his own to benefit this country, the USA. But, he didn't. Most of his thoughts, his political 'ammunition' as it were, were carefully manufactured for him in advance by the CFR-One World Money group. Brilliantly, with great gusto, like a fine piece of artillery, he exploded that prepared 'ammunition' in the middle of an unsuspecting target, the American people—and thus paid off and retained his internationalist political support."

While Roosevelt was campaigning on promises to steer America clear of the war in Europe, numerous proofs including secret correspondence with fellow Freemason Winston Churchill show he was intent on leading the US into the conflict at a gallop—significantly, from behind a desk. Eighty-three per cent of Americans opposed American intervention, but the bankers and Roosevelt knew better. They had other plans, including loans in excess of two billion dollars to Great Britain, the shipping of fifty destroyers and hundreds of millions of rounds of ammunition, and the training of British fighter pilots in the US. All German consulates were closed in this country,

while US ships depth-charged German U-boats, still without declaration of war.

Churchill reported in secret that FDR "...said he would wage war, but not declare it [and] that he would become more and more provocative... Everything was being done to force an 'incident' that could lead US to war."

Henry Stimson, founding CFR member, US War Secretary and leader of a powerful American interventionist coalition, made the following notation in his diary after a meeting with Roosevelt: "We face the delicate question of diplomatic fencing to be done so as to be sure Japan is put into the wrong and makes the first bad move—overt move."

The CFR's War and Peace Studies Project was quick with the solution to the quandary. A memorandum was sent to Roosevelt, recommending aid to China and a trade embargo on Japan, advice which Roosevelt followed. Japan's assets in the US were frozen, and the Panama Canal was closed to Japanese shipping, effectively creating a stranglehold on Japanese trade.

The CFR's War and Peace Studies Project was to be a central determinant of future aims of the United States. Closely collaborating with the State Department, the Studies Project divided the world into blocs, compiling available statistics on commodities production and trade. Determining that the self-sufficient capacity of Germany and Europe was higher than that of the Western hemisphere, the Studies Project decided that the defeat of Germany and world domination by America was the only solution. America must broaden its imperialistic aims, creating

an expanding capitalist world economy and international hegemony for the US. It was not explicitly stated which groups or individuals would rule the US during this period of expansion, although it is certain that Will Rogers was at no time under consideration.

The "foremost requirement of the United States in a world in which it proposes to hold unquestioned power," the Studies Project reported, "is the rapid fulfillment of a program of complete re-armament." Herein the course for World War II and postwar world domination by "America" was charted.

Much has been written in recent years about Roosevelt's prior knowledge of an attack on Pearl Harbour, which included American manoeuvres against Japan making reprisal almost inevitable, and information of a probable attack reaching Roosevelt through at least eight different sources. It was a day of infamy, as John Toland has reiterated in his book of the same title, and Roosevelt had provoked his desired "incident".

After the attack on Pearl Harbour, Allen Dulles joined the staff of the Office of Coordinator of Information (OCI), precursor to the Office of Strategic Services (OSS). J. Edgar Hoover objected to the men Dulles was hiring, characterising the Dulles family as "internationalists". Hoover may have been onto something.

It was strictly 'business as usual' during the Second World War for many of these same "internationalists". During 1942 Standard Oil of New Jersey shipped oil to the Germans through neutral Switzerland, while General Motors equipped both sides during the conflict. The Paris branch of Chase Bank conducted millions of dollars of business with the Nazis with the approval of the central Manhattan branch, while Colonel Sosthenes Behn, the head of ITT, consulted with Hitler on communication systems and robot bombs. Ball bearings, in short supply among the Allies, were shipped to Nazi-connected firms in South America by the Vice-Chairman of the American War Productions Board, in partnership with Nazi Goering's cousin in Philadelphia.

An American alliance with Stalin provided tacit approval to his slaughter of six million Ukrainians during 1932-33, along with the joint German-Russian invasion of Poland, and the Russian invasion of Finland, Latvia, Estonia, and Lithuania. Eleven billion dollars in lend-lease aid was given to the USSR, along with blueprints for the atomic bomb and shipments of refined uranium, proffered by the CFR's Harry Hopkins, according to G. R. Jordan's *From Major Jordan's Diaries*. After the war the American military cooperated in Operation Keelhaul, sending two million fleeing Russians back to Russia in boxcars to face Stalin's murderous reprisals.

World War II is the story of the death of thirty-five million patriotic, slogan-shouting serfs, while billions of dollars lined the pockets of the international bankers and their cohorts, the politicians and the weapons manufacturers.

At the close of the war, so goes the standard line, Hitler committed suicide in his bunker. For my part, I am not convinced. Many other prominent Nazis escaped to conspire another day; why not Hitler, who had the entire resources of

the Third Reich at his command? Hitler's notoriety dictated that his death be faked (as the deaths of other Nazis have been faked since the end of the war—Martin Bormann's six times, for instance), but the mysterious circumstances and lack of evidence of his death weigh in favour of the theory that Hitler escaped.

Wayne Henderson, in an unpublished article, offers revisionist information on Hitler's death:

"In February of 1973, a journalist was given a rare interview with a man long thought dead. Though he was generally believed to have died trying to escape Berlin—scant yards ahead of Russian troops then taking the city—Martin Bormann, close intimate of Adolf Hitler, was living in seclusion, ill, in a Redemptorist convent near Tupiza, Bolivia. He, among others, had been the recipient of a joint gift of "Wild Bill" Donovan of the OSS (later the CIA) and certain well-controlled factions of the Vatican Elite.

"Bormann had been among the Chosen Few present at the bunker on 30 April 1945—others present included Otto Gunsche (Hitler's adjutant), Heinz Linge (Hitler's valet), and Julius Schaub, a trusted friend of the Führer who was charged with the responsibility of destroying the files; it goes without saying that Hitler and his bride of 24 hours, Eva Braun, were also there. According to the official version, Adolf and Eva died that day, though there is some disagreement as to whether they used pistols or poison.

"What really happened on 30 April 1945, however, would seem to be quite different from the official version. Hans Bauer, the Nazi flying ace—easily one of the greatest aviators the world has yet seen—had been landing and taking off outside the Chancellory, on the Wilhelmstrasse. He had ferried the favoured few in and out of Berlin, and could easily have removed Hitler and his retinue at any time, every bit as easily as he'd flown the various caches of personal wealth entrusted to him by the Nazi elite to various safe hiding-places. Indeed, Bormann and others had advised Hitler to fly to Berchtesgaden, where the faithful troops could guard them in the near impenetrable Alps.

"However, a flight—at least from the Chancellory—was unnecessary. When the Soviets took the wreckage of the bunker, they found '...behind the bookcase in Hitler's personal room...a thin, concrete, removable panel. Behind it was a man-size hole leading to a...concrete shelter far underground and 500 metres away. Another tunnel connected the shelter with an underground trolley line...' The searchers also found 'a charred note in a woman's handwriting... (telling) her parents not to worry if they did not hear from her in a long while.' The Hitlers need not have taken the trolley very far, either, as Bauer could easily have picked them up at a safer airstrip than Wilhelmstrasse and flown them to any destination within fuel range. The body later identified—in the official version—as that of Hitler was more likely (considering the fact that the dentition of the corpse and that reflected in Hitler's dental charts don't match) that of Julius Schreck, a long-time fanatical supporter of the Führer and Hitler's personal driver. Schreck is known to have resembled Hitler so

World War II is the story of the death of thirty-five million patriotic, slogan-shouting serfs, while billions of dollars lined the pockets of the international bankers and their cohorts, the politicians and the weapons manufacturers.

USA

BACKGROUND AND PURPOSE

A great scientific experiment came to a climactic and frustrating end when, on 21st August 1993, communication with NASA's Mars Observer spacecraft was reported lost after its successful completion of an eleven-month journey to the Red Planet.² Just three days before it was to enter Mars orbit, but shortly after instructions for orbital insertion had been uploaded, the spacecraft mysteriously failed to respond to commands from the ground or to signal its presence to its controllers at the Jet Propulsion Laboratory in Pasadena, California. In the weeks following, repeated attempts to restore communications have been made. As of this writing, all efforts have failed.

This apparent tragedy, ending the first mission to Mars since the Viking probes of 1976, is part of a much larger story—a story of deception and scientific irresponsibility designed to suppress or prevent what might be one of the greatest scientific discoveries in all of human history. With a replacement mission in the planning, a very real possibility exists that the scenario that dominated the Mars Observer mission may be repeated. This report chronicles the ongoing picture of scientific, ethical and political concern within which the Mars Observer mission took place, in the hope that the mistakes and distortions that plagued that mission will not be repeated.

THE MARS OBSERVER SPACECRAFT

The Mars Observer, launched 25th September 1992, was the first of an "Observer series" of missions for planetary exploration. The principal objective of the mission was to gather information on the geology and climate of Mars.³ Mars Observer was scheduled to reach its destination in August 1993 and begin its "mapping phase" by November 1993. The mapping phase was to last for one Martian year, or 687 days.⁴ During this phase the Mars Observer camera would relay low-resolution photographs of the entire planet daily. It would also take moderate-resolution photographs (size of smallest visible objects 300 metres) and high-resolution photographs (size of smallest visible objects 11 and 1.4 metres) for the purpose of securing geological and albedo (reflectivity) information on targeted areas of interest.⁵ The Mars Observer was reported "lost" by NASA on 21st August 1993, shortly after instructions for orbital insertion had been sent to the spacecraft. At this writing, communication with the spacecraft has not been reestablished, and NASA is still attempting to overcome the problem. It is not known whether the Mars Observer has gone into orbit around Mars or has passed the planet and entered a solar orbit.⁶

THE AOC HYPOTHESIS

During the 1976 Viking mission to Mars, photographs of the planet were obtained at a 50-metre resolution.⁷ In the seventeen years since then independent research groups have engaged in an exhaustive study of certain unusual surface features revealed in the Viking images, most of which are located in an area of Mars known as the Cydonia Plain.⁸ All of the independent researchers have concluded that the data supports the possibility that some features at Cydonia may be the ruins of intelligently designed structures. I will refer to the hypothesis that the Cydonia features may be of artificial origin as the AOC hypothesis (Artificial Origin at Cydonia).

The AOC hypothesis does not claim that there is *proof* of artificial features on Mars; it claims that the probability of there being artificial features is strong enough to make new high-resolution photographs a top priority for any future mis-

sion to that planet—including the Mars Observer mission, should communications with that spacecraft be restored.⁹

Some of the researchers have gone further in their hypotheses regarding the Martian objects, and others have not. The present discussion is not intended to support or deny any features of these extended hypotheses.¹⁰ The immediate purpose of this paper is to determine and evaluate the relationship between evidence supporting the AOC hypothesis and NASA's policy on setting priority levels for targeting the Cydonian features for observation, as well as NASA's policies regarding public access to any such data once it is obtained.¹¹ The long-term purpose is to illustrate the political, ethical and scientific tension that arises when the potential of a discovery that could cause a major shift in our understanding of ourselves and our history comes up against the biases of individual scientists and the interests of a government bureaucracy.

PRIORITY LEVELS

This report has been prompted in part by a document distributed by NASA titled "Information on NASA Re-pho-

tographing the Cydonia Region of Mars" and letters written in January and October 1992 by Dr Michael Malin, NASA Mars Observer Camera Principal Investigator, and Mark A. Pine, Chief of the Policy and Plans Branch of the NASA Office of Space Science and Applications (references 8, 9 and 11).

Dr Malin's letter indicates that the Cydonia region of Mars, where the AOC landforms are located, was targeted for high-resolution photography as part of a general plan to secure images of scientifically interesting natural geological formations. However, the AOC hypothesis played no significant role in the prioritising of NASA objectives. This position is reiterated in the letter from Mark A. Pine and in other NASA documents: "NASA has no plans to treat images of the Cydonia region any differently than those of the other regions of the Martian surface."¹² While the region in general may be targeted, this does not guarantee any special effort to image the AOC

...the possible social consequences of an extraterrestrial discovery and to consider whether such a discovery should be kept from the public in order to avoid political change and a possible "devastating" effect on scientists themselves...

landforms. Careful analysis of NASA priorities as embodied in the Mars Observer mission indicates that in all probability they would not be included.

Enlargement of NASA Viking frame 35A72, showing the Face feature. Estimated dimensions of the 'Face of Cydonia' are: 2.5km long, 2km wide, and between 500 and 800 m high.

TECHNICAL UNCERTAINTIES

Both Dr Malin and Mr Pine were also careful to stress that because of technical uncertainties no guarantees could be made regarding photographs of any specific features. Yet plans were under way to photograph other specific features than the AOC landforms, and in these cases, instead of emphasizing technical uncertainties, discussion of ways and means of accomplishing this took place. The special emphasis given to the possibility of difficulties in the particular case of the AOC landforms has a clearer rationale as part of a general pattern of discouraging interest in those particular landforms.

RESTRICTION OF INFORMATION

As the Mars Observer mission proceeded, considerable furor arose in connection with NASA's policy for data release. NASA announced that in the case of the Mars Observer mission, unlike previous missions, there would be *no immediate transmission of photography to the public*. Data may be withheld from the public for as long as six months solely at the discretion of the "Principal Investigators" holding private contracts with NASA (reference 9). As of June 1993 there were indications that NASA, under considerable public pressure to modify this policy, was considering easing the restriction (see Chapter Nine). However, hopes for this were dashed when NASA announced that only "selected" images were to be made available for viewing at two or three sites around the country with no release to the general public via NASA Select-TV. There was no guarantee that these images would include the AOC landforms.¹⁹ To see the images, a person would have to travel to Pasadena, Washington or Houston and then sit watching a special screen for hours or days with no assurance that the AOC objects would be imaged at all—or, if imaged, "selected" for viewing. NASA was apparently trying to create the impression of a more liberal policy on data release without actually making any significant change. In later chapters of this report, NASA's policy on data release will be discussed in detail. The summary conclusion is that for the Mars Observer mission, NASA introduced a severe restriction on data release, providing a new potential for censorship, under cover of a technicality.

Since 1979, a number of highly qualified independent investigators have engaged in an extensive analysis of photographs taken by the 1976 Viking Mars mission. These photographs appear to be evidence that some landforms in the Martian region called Cydonia may be artificial.

A comprehensive independent analysis of the data supporting this hypothesis, using established criteria for scientific methodology, shows that the methods of research pursued by the independent investigators are basically sound. There is a reasonable doubt as to the natural origin of the Cydonian objects. Reputable scientists in several fields, including physics, astronomy and geology, have expressed their confidence in the overall integrity of this report and have called for further investigation of these landforms by NASA.¹

However, during the seventeen years since the controversial landforms were discovered, NASA has maintained steadfastly that there is "no credible evidence" that any of the landforms may be artificial. A close look at NASA's arguments reveals that NASA's "evaluation" has consisted largely of initial impressions from unenhanced photographs, heavily weighted by faulty reasoning. NASA has failed to apply any special methods of analysis; it has relied upon flawed reports; it has failed to attempt verification of the enhancements and measurements made by others; and it has focused exclusively on inappropriate methodology which ignores the importance of context. There remains no scientific basis for NASA's position regarding the landforms.

Finally, NASA has based its evaluation almost exclusively on the alleged existence of disconfirming photographs which it has never identified, and has recently admitted it is unable to identify.

Instead of carrying out legitimate scientific inquiry, NASA has regularly sent false and misleading statements regarding the landforms to members of Congress and their constituents. NASA has condoned efforts to unfairly ridicule and discredit independent researchers, and has insisted that there is a "scientific consensus" that the landforms are natural—despite the fact that the only real scientific study of the landforms indicates a clear possibility that they are artificial.

Of the various landforms investigated by the independent teams and individuals, the one that began the research, referred to as the "Face" because of its resemblance to a humanoid face, has

undergone one of the most exhaustive series of tests for the evaluation of digital images originating from an interplanetary probe available to scientists today. The data collected in the course of these investigations appears to be highly reliable.

The most advanced techniques of image enhancement, photogrammetry and fractal analysis, confirmed by cross-checking and thoroughly documented, have been used. The investigators are acknowledged experts in their fields with strong academic and professional qualifications. In every test, the data has consistently tilted in the direction of artificial, rather than natural, origin. Moreover, the various tests performed, including anthropometric and aesthetic evaluation, have been mutually cross-confirming.

In September 1992 a new spacecraft—the Mars Observer—was launched. Now reported lost, the Mars Observer carried a camera capable of taking high-resolution photographs that would almost certainly have settled the question of artificiality. But NASA's position regarding the priority assigned to photographs of the landforms has been throughout to resist any consideration of their possible artificial origin. NASA's equivocal statements on the issue of priorities indicated a clear likelihood that new photographs of the suspect landforms would not be obtained, or would not be released if they were obtained.

If NASA's Mars Observer policy remains unchanged, future missions to Mars will almost certainly not include any meaningful effort to settle the question of artificiality. NASA

Unlike previous missions, there was to be no conveyance of camera data to the public as soon as it was received and converted into viewable images (what is often called 'live' transmission).

is in the process of evaluating options for a new Mars launch as early as October 1994. As of this writing, the selection of the spacecraft and instrumentation to be used for a new launch is under way, allowing the previous policy to dominate a new mission would constitute a reprehensible abdication of a clear and compelling social responsibility.

NASA'S POSSIBLE MOTIVATION

In 1960, a report titled *Proposed Studies on the Implications of Peaceful Space Activities for Human Affairs* was delivered to the Chairman of NASA's Committee on Long-Range Studies. The report was prepared under contract to NASA by the Brookings Institution, Washington, DC. The report outlines the need to investigate the possible social consequences of an extraterrestrial discovery and to consider whether such a discovery should be kept from the public in order to avoid political change and a possible "devastating" effect on scientists themselves—due to the discovery that many of their own most cherished theories could be at risk.

The concept of withholding information on a possible extraterrestrial discovery conflicts with an understood NASA policy to the effect that information on a verified discovery of extraterrestrial intelligence should be shared promptly with all humanity. A report on the cultural aspects of the search for extraterrestrial intelligence (SETI) is presently being prepared for publication by the NASA Ames Research Center. In this report, the position that NASA would not withhold such data from the public is said to be strongly supported.

NASA's actual behaviour in the specific case of the Martian objects, however, does not appear to be consistent with this policy. NASA has regularly distributed documents containing false or misleading statements about its evaluation of the Face to members of Congress and to the public. The absence of legitimate scientific evaluation of the landforms by NASA, its ignoring of the relevant research, its apparently exaggerated warnings that such photographs would be extremely difficult to obtain, the possible sequestering of the data under the aegis of 'private contract', and the ambiguous language used by NASA officials to generate a sense of complacency around the issue all support the suspicion of a motivation contrary to the stated policy.

MISLEADING ASSURANCES

When forwarded enquiries from constituents by United States senators and representatives, NASA has provided answers which may appear plausible to the uninformed, but which cannot withstand even the slightest logical scrutiny. Among the various misleading assurances given by NASA are those having to do with NASA's policy for Mars Observer camera data release. On the first mission to Mars in seventeen years, with growing public interest in the artificiality hypothesis and NASA's vigorous resistance to that hypothesis, NASA made a radical change in the way photographic data from the spacecraft would be handled. Unlike previous

missions, there was to be no conveyance of camera data to the public as soon as it was received and converted into viewable images (what is often called 'live' transmission). Instead, images from the Mars Observer camera would be under the exclusive control of a private contractor for up to six months after acquisition.

This same private contractor had been given sole authority to determine not only what images would be released and when, but even *what objects would be photographed by the high resolution camera*. That contractor, Dr Michael Malin, is an outspoken opponent of the hypothesis of possible artificiality. Dr Malin's arguments against the hypothesis of possible artificiality have been uniformly fallacious. Thus the interests of the American public in relation to Mars Observer camera data were effectively turned over to the prejudiced decisions of a private individual.

The credibility gap widened as NASA, using contractual technicalities, insisted that it was treating Mars Observer imaging data "no differently" than data from previous missions—despite the fact that the end result would have been radically different as far as immediate public access and public accountability were concerned. It is impossible, from a logical standpoint, to see NASA's efforts to claim "no change in previous policy" as anything but a transparent attempt at misdirection.

In the face of growing public clamour, NASA also began to make assurances that the "Cydonia region" where the landforms are located was scheduled to be photographed by the high-resolution camera. NASA clearly attempted to put the public at ease by making it appear that the landforms would likely be photographed because of NASA's general interest in the geology of the "region". But the Cydonia

region is a vast area, and high-resolution photography would cover only a very small percentage of that area. No special priority for the specific landforms in question has ever been contemplated. Under the standing policy, the likelihood is high that the landforms will not be photographed, regardless of assurances about the "region".

RECOMMENDATIONS

Given the importance of the subject and the urgent need to take action, I have put forward the following recommendations. These recommendations apply to the Mars Observer mission in the event the spacecraft is recovered, and to any future missions, including a mission specifically to replace the Mars Observer.

- Assuming Mars Observer is not recovered, NASA will select a replacement spacecraft carrying instrumentation capable of achieving high-resolution imaging of the Martian surface at least superior to that of the Viking missions of 1976, and having the highest degree of camera flexibility possible, including pointing capability.

- NASA and any private contractor who may be involved in imaging, by agreement, will assign a level of priority to the suspect landforms that will ensure the obtaining of high-reso-

All of the independent researchers have concluded that the data supports the possibility that some features at Cydonia may be the ruins of intelligently designed structures.

lution photographs of those landforms, using all means at their disposal, subject only to uncertainties beyond their control. This priority level will be entered into the imaging Target Data Base and taken into consideration in mission sequencing. The stated purpose of taking such photographs will include the possibility that they are of artificial origin.

- The camera operator will plan for and initiate high-resolution imaging sequences on *every occasion* (20 to 30 times in the case of Mars Observer) during which the spacecraft groundtrack is within the area from 8° to 10° longitude, such that the image strips include the area 40.4° to 41.2°N latitude.

- All imaging data gathered during camera passes over the area specified above, will be placed in the category 'news-worthy' and will not be subject to the proprietary aspects of any principal investigator's contract with NASA. This includes the raw data prior to processing, but after the camera data has been separated from that of other instrumentation.

- The scientific community and the general public will be given advance notice, within the constraints of predictability, as to when each such pass will occur, in order to prepare to receive the data.

- The raw data for the specific area indicated above will be released to scientists and to the public upon receipt at JPL with no time delay.

- Video image conversion of data received in the same passes will be released in a continuous stream to NASA Select-TV, PBS and others who desire to receive it. NASA will be held accountable for any inordinate delay between receipt of the raw data and release of video imagery. No delay should occur other than the minimum time period nec-

essary for computers to convert the data to video form. NASA should provide in advance specific technical details of what procedures are necessary for conversion and how long they are likely to take.

- Video image conversion of *all* high-resolution camera activity, regardless of location on the planet's surface, will be released in a continuous stream to NASA Select-TV, PBS and others who desire to receive it throughout the course of the mission. Because of its extreme importance, this data release will take precedence over regular NASA programming for as long as is necessary to achieve the goal of providing the public with open access to the data that may settle the question of artificiality.

- A blue-ribbon interdisciplinary panel of independent scientists and lay persons should be appointed to enquire into the circumstances surrounding NASA's questionable behaviour in regard to the suspect landforms in particular, and NASA's concept of SETI (Search for Extraterrestrial Intelligence) methodology with respect to the solar system, particularly Mars and the Moon. Among the panel's charges should be the undertaking of an unbiased scientific evaluation of the data gathered by the independent researchers to date, and an oversight committee to monitor NASA's compliance with the additional recommendations set forth below. As members of such an oversight committee, independent researchers Vincent DiPietro, Dr Mark J. Carlotto, and Richard C. Hoagland, representing the three main lines of approach to the subject, should be included.

The HIV Connection?

1072 Folsom Street, Suite 321
San Francisco, CA 94102, USA

The HIV Connection?, a group of individuals including scientists and lay people, announced on 12th October 1992 that it will make its position paper, *The AIDS Crisis: The Other Side*, available to the public. The position paper presents an objective, documented and referenced history and overview of the dominant, publicly accepted theory that HIV is the sole and direct cause of AIDS.

The group was formed by Ed Vargas in 1992, for the purpose of providing factual and documented information on HIV and AIDS that is not distributed by the AIDS establishment. Today the group consists of people from all AIDS-affected communities and is focusing on educating the media, policy makers, people with AIDS and people with HIV.

By distributing *The AIDS Crisis: The Other Side*, the group hopes to initiate a reassessment of the current HIV-AIDS hypothesis. The group hopes that this reassessment will lead to a more productive AIDS hypothesis in terms of public health benefits including AIDS prevention, treatment and prediction of the course of the epidemic.

THE AIDS CRISIS: THE OTHER SIDE

In April 1984, US Health and Human Services Secretary Margaret Heckler announced to the world at a press conference that an American scientist, Dr Robert Gallo, had discovered the "probable cause" of Acquired Immune Deficiency Syndrome (AIDS)—the retrovirus subsequently named Human Immunodeficiency Virus (HIV).

Since this announcement, the AIDS epidemic and our understanding of it has been fought on a politicised landscape. Margaret Heckler, a politician, made this announcement before one single American study on HIV had been published. In addition, no discussion, review or debate of its merits occurred in any medical or scientific journals. This process of science by press release violated conventional scientific procedures and customs.

The political decision to credit Gallo with the discovery of HIV failed since subsequent investigations have established that HIV was discovered in 1983 by Dr Luc Montagnier of France, who sent a sample of his discovery to Gallo.* The retrovirus Gallo claimed to have discovered was the same retrovirus he had received from Montagnier.¹

Immediately following Heckler's announcement, Gallo published four articles in *Science* (May 1984) that showed correlations between HIV and AIDS. These articles, which are the basis for the current hypothesis that HIV is the sole and direct cause of AIDS, were proved fraudulent on many counts critical to their scientific validity by recent investigations conducted by the National Institutes of Health and the National Academy of Sciences.²

Since the April 1984 news conference, there has not been a single scientific research publication that purports to prove that HIV causes AIDS. In addition, there's been a lack of discussion and debate both outside and within the scientific community *specifically* addressing the contradictions and inconsistencies with the current HIV-AIDS hypothesis and the epidemiological research on which it is based. To compound this, the current HIV-AIDS hypothesis has been entirely unproductive in terms of public health benefits, including AIDS prevention, treatment, and even in predicting the course of the disease within each individual or the course of the epidemic within the general population.

The following document is an overview of the viral and epidemiological contradictions and inconsistencies of the current HIV-AIDS hypothesis which have not been *specifically* addressed by our AIDS establishment.

This document hopes to show that the American government and scientific community need to seriously reassess the current HIV-AIDS hypothesis and their AIDS research priorities. We hope this reassessment will lead to a more productive AIDS hypothesis and investigations of other factors and/or causes of AIDS with or without HIV as a factor.

HIV-AIDS HYPOTHESIS

The current HIV-AIDS hypothesis states that the retrovirus,** HIV, infects and kills CD4 and T-cells. Depletion of these T-cells in the body is one of the hallmark conditions in People With AIDS (PWAs) and results in a weakened immune system, leaving the body susceptible to one or more of the 25 previously known diseases grouped together in a syndrome called AIDS.

In the last eight or so years of intensive HIV research, it has been proven that only 1 in 10,000 T-cells are actively infected with HIV,³ even using the newly advanced technique of detection called PCR.*** This degree of T-cell loss is equivalent to losing a drop of blood a day. Anyone could afford to lose this quantity without developing any symptoms. The ongoing question in the scientific community is: What is killing the billions of T-cells and depleting other cells in the immune system such as Natural Killer (NK) cells, seen in PWAs, if HIV is not solely responsible?

Even though we don't know the exact mechanisms by which viruses cause disease, the current HIV-AIDS hypothesis claims that HIV lies dormant in these T-cells for up to 15 years. Then, by way of some unknown mechanism, HIV is activated to destroy additional T-cells. This latency period is unexplainable by the scientific community since no known virus or retrovirus takes 10-15 years or more to cause disease, and contradicts other long-established principles of virology.¹³

In spite of its political notoriety, HIV is scientifically a run-of-the-mill retrovirus. It is genetically so similar to other non-pathogenic retroviruses that no one within the scientific community can explain or show that HIV exhibits any characteristics that would distinguish it from any of the other retroviruses.⁴ There are approximately 100 retroviruses in the human germ line. After more than 20 years of intensive research on retroviruses (Nixon's War on Cancer), none has ever proven to cause disease.⁴ To date, there has been no scientific evidence that explains why this retrovirus should be an exception.

HIV VIRUS vs ANTIBODIES TO HIV

The primary function of any virus or retrovirus is to replicate itself in the cells of a host organism, such as a human body. Some viruses, like those responsible for polio and hepatitis, kill cells in the process and thus cause disease. If the polio virus kills sufficient neurons, the human host (body)

becomes paralysed. A vaccine like the Salk or Sabin polio vaccines stimulates the body to produce antibodies which neutralise the virus and thus prevent disease. The presence of antibodies, especially if live virus is absent or is present in low quantities, indicates that the body's immune system has succeeded in controlling the virus, thus preventing disease.

Shortly after HIV infects the body the virus multiplies rapidly, sometimes causing flu-like symptoms.⁴ Thereafter, the immune system goes to work producing antibodies which virtually eliminate the virus. Only very low levels of the live HIV remain—so low they can only be detected with great difficulty by advanced PCR techniques—but antibodies persist and are readily detectable. Presence of antibodies to HIV (HIV+) in the blood has become a prerequisite for AIDS. But longstanding principles of virology¹³ hold that when antibodies are present from any virus or retrovirus, this indicates that the immune system has rendered the virus harmless and the body is protected from further symptoms or disease. This is the principle of antiviral vaccination. A positive antibody test to HIV is the current clinical indicator for AIDS. There is no scientific precedent for an anti-viral antibody forecasting a viral disease.

EPIDEMIOLOGICAL EVIDENCE

Because no one knows of a mechanism by which HIV could perform all the destructive activities associated with full-blown AIDS, the HIV-AIDS hypothesis has always depended solely upon epidemiological evidence.

Epidemiology is a branch of medicine studying the course a disease takes in a population. In short, epidemiology is a 'soft science' based on survey research. The main reason for believing that HIV causes AIDS is statistical correlation: most persons suffering from AIDS also test positive for antibodies to HIV. This correlation is much less impressive than at first appears. Indeed, to a large extent it is a product of the HIV hypothesis itself. AIDS is defined as prior HIV infection

plus symptoms like T-cell depletion and diseases like Kaposi's sarcoma, pneumonia, candidiasis and so on. In many cases, HIV is presumed where the indicator diseases have been diagnosed, even though the HIV test has not been performed. The statistical correlation of HIV and AIDS is thus built into the definition of AIDS. If the epidemiological evidence is evaluated without a pre-existing bias in favour of the HIV hypothesis, however, many facts emerge which cast doubt on HIV as the sole and direct cause of AIDS. As for example:

1) Predictions of the spread of AIDS based on the HIV hypothesis are continually being readjusted.⁹ AIDS has not significantly spread beyond the original risk groups and there are many fewer cases of full-blown AIDS than anticipated. For this reason the 'latency period' has continuously been extended. It is now up to 10-15 years and still growing. This 'latency period' is a statistical product designed to reconcile the relatively low incidence of AIDS with the relatively high level of HIV infection.⁶

After more than 20 years of intensive research on retroviruses... none has ever proven to cause disease. To date, there has been no scientific evidence that explains why this retrovirus [HIV] should be an exception.

2) The number of HIV carriers has remained relatively constant at about 1 million since 1985 when the antibody test was initiated.⁵

3) There is not enough HIV in the bodies of PWAs to account for the billions of T-cells being killed.⁷

4) HIV can hardly be isolated from patients with AIDS, suggesting that the body's natural vaccination process has occurred.⁷

5) Kaposi's sarcoma has been found in many young male homosexuals who have never been infected by HIV. Even adherents of the HIV hypothesis now concede that KS is not caused by HIV. Nonetheless, this disease is diagnosed as 'AIDS' but only when the sufferer also has antibodies to HIV.⁸

6) Other AIDS indicator diseases with T-cell depletion are found in individuals who do not have antibodies to HIV. In fact, all AIDS diseases have occurred in all risk groups in the absence of HIV or its antibodies since the beginning of the epidemic. HIV infection is thus not a necessary prerequisite for a diagnosis of AIDS—were it not for the biased definition.^{7,8}

7) Tests show that the number of HIV-infected T-cells remains the same no matter if you are asymptomatic or have full-blown AIDS. Any other viral infection would show a dramatic increase throughout the course of the disease.⁷

8) Although sexually transmitted diseases infect males and females equally, more than 90% of American AIDS sufferers are male. This is true even of health care workers who develop AIDS, although two-thirds of all US health care workers are female.⁶

9) The risk of getting AIDS for HIV-infected people varies tenfold with gender or country. In America, the annual AIDS risk of an HIV-infected person is currently 4%; in Africa it is 0.3%.^{6,7}

10) HIV is spread primarily through homosexuals in the US and primarily through heterosexuals in Africa.⁷ This would suggest that AIDS is possibly a non-infectious disease.

11) So-called "African AIDS" affects males and females equally, and also involves a different pattern of associated opportunistic infections. These differing patterns do not rescue the HIV hypothesis for American AIDS, but indicate that a single virus may not be responsible for the multitude of conditions diagnosed as AIDS in Africa and America.⁷

12) About three-fourths of the 20,000 US haemophiliacs were infected with HIV almost 10 years ago. According to the HIV hypothesis, at least half of those infected should have died by now—but the mortality rate among haemophiliacs has remained constant at 2% over the last 15 years.¹⁰

13) HIV is said to be a sexually transmitted virus, yet it is barely detectable in the semen of AIDS patients.¹¹

14) The same diseases are found in similar frequencies in HIV-positive and HIV-negative intravenous drug users, and the overall mortality in the two groups is the same.¹²

CURRENT STATE OF AFFAIRS

Currently 1 billion dollars is spent on AIDS research each

year by the US government alone. This money is devoted almost solely to projects based on an unproven and so far entirely unproductive hypothesis with mounting inconsistencies and contradictions. Specifically, most of the research dollars are spent on vaccines and anti-virals which may be of little value considering:

a) antibodies to HIV have already vaccinated the blood of PWAs; and

b) such minuscule amounts of HIV are found in the blood of PWAs that anti-virals would have little efficacy.

In consideration of the evidence presented, The HIV Connection? calls on our AIDS establishment to immediately

reassess the current HIV-AIDS hypothesis and to encourage research into other possible causes of AIDS. The group hopes this reassessment will lead to a more productive AIDS hypothesis in terms of public health benefits, including AIDS prevention, treatment and prediction of the course of the epidemic within the population at large and the course of illness within each individual.

FOOTNOTES

* Technically, Gallo has been partially credited with the discovery of HIV but the French/American agreement to split the profits and recognition still remains, against the will of the French government.

** Retroviruses are a subset of viruses. Essentially they are very similar, except in replication process, viruses convert DNA to RNA. Retroviruses are the opposite in that they convert RNA to DNA.

*** PCR is Polymerase Chain Reaction, a method of amplification. It is the biochemical equivalent of finding a needle in a haystack.

MAGNETISM

The late Albert Roy Davis, a Florida physiologist and researcher on biomagnetism, received US Patent #4,020,590 (3 May 1977) for his system of gardening with magnetism. Davis recommended treating the seeds of plants that grow above ground in water with the south pole of a 1,500 to 2,500 gauss magnet. "We found after many years of research that treating above-ground seeds with the south pole of a magnet increases the germination and growth, and the leaves of these vegetables are larger."

"If you plan to treat seeds that result in plants with their edible portions underground, such as beets, potatoes, carrots or turnips, then you will produce a better result by using the north pole of the magnet," Davis said in an interview given to *Natural Foods and Farming* magazine in April 1981. The effects achieved are due to the magnetic influence of softening the surface tension of water, which is more readily absorbed by the seeds and plants.

According to U. J. Pittman of the Canadian Agricultural Research Station in Lethbridge, Alberta, "Earth's magnetism can affect the direction of root growth of some plants, and also the growth rate of some seedlings.

"The roots of some plants normally align themselves in a north-south plane approximately parallel to the horizontal force of Earth's magnetic field." Such plants include winter wheat, wild oats, spring wheat and some weeds. "Winter wheat seeded in rows running at right angles to the magnetic north often outyield wheat seeded in other directions by 3 to 4 bushels/acre because the roots grow in a north-south direction and utilise nutrients and moisture in the inter-row areas more extensively.

"Seeds of some varieties of wheat, barley, flax and rye were found to germinate faster and grow more during their seedling stages, when their long axes and embryo ends are pointed toward the north magnetic pole, than when they are pointed in any other direction.

"Many seeds germinate and grow about two times faster if they are exposed to the north pole of an artificial magnetic field before they are planted, than if they are not so treated—wheat seed in particular grows about five times as much in the first 48 hours as unexposed seed.

"In some species the enhanced growth rate persists through to maturity. Green snap beans thus mature more uniformly and yield more than those from untreated seed planted randomly.

"The effects of magnetic treatment before germination appear to remain active within some seeds for at least 18 months after application. The magnetic intensity required to give maximum response appears to be between 0.5 and 100 oersteds when applied for 240 hours. For some unknown reason, a greater growth response occurs if the seeds are subjected to magnetism for 48, 144, 240 or 336 hours than if exposed for intermediate periods. An exposure for 240 hours produces maximum responses in most seeds tested." (Ref.: U. J. Pittman, *Canadian J. Plant Sci.* 43:513-8 (1963); *ibid.*, 52:727-33 (September 1972).)

The sexual determination of monoecious plants such as corn and cucumbers also is affected by the geomagnetic field: "If the embryo radical of such plants is orient-

ed toward the north, a greater number of female flowers is formed than in the case of seeds oriented toward the south. Since cucumber fruits are produced from the female flower, northward orientation of the seed radicals will lead, of course, to greater yield per plant."

In general, northward orientation of the embryonic radical (particularly of corn) promotes femaleness, while orientation south encourages masculinity. Several investigations have revealed that the response of seeds when oriented toward the geomagnetic poles depends on the left- or right-handedness of the seed and the sexual characteristics of the plant type. When oriented with the tip of the embryo radical toward the south geomagnetic pole, laevorotary seeds have higher rates of growth, respiration and enzymatic activity and up to 50% greater yields. Likewise, dextrorotary seeds respond with 7% to 32% enhanced growth and yields when their embryo tips are pointed at the Earth's north geomagnetic pole.

When conifer seeds are sown with their embryo radicals oriented south, they germinate 4 to 5 days earlier than do seeds oriented toward the north pole. Phases of the Moon have a profound effect on the germination of conifers: when sprouted with their embryo radicals oriented south during a full moon, they will germinate faster than when germinated during the new moon.

If there is any doubt about the directivity or gender of seeds, positive results can be obtained in any case by two weeks' treatment in the magnetic null, the quiet region where the magnetic pull is balanced between north and south. This region is easily located by observing the patterns formed by iron powder scattered on a glass pane placed over the magnet.

U. J. Pittman also grew potatoes from excised, magnetically-treated eyes. The field-grown crop yielded about 17% more marketable tubers that weighed 38.5% more than those

grown from untreated eyes! Pittman concluded that "Pregermination magnetic treatment of the eye may have effected a change in the metabolic process in the bud that eventually promoted earlier and greater tuber initiation. Tubers initiated early would have had more time to develop size than those initiated later."

Other researchers have found that exposure of seeds to

Other researchers have found that exposure of seeds to magnetic fields increases the percentages of germinations of unchilled apricot and apple seeds, increases the yields of snap beans, accelerates the growth of legume and cereal seedlings...

magnetic fields increases the percentages of germinations of unchilled apricot and apple seeds, increases the yields of snap beans, accelerates the growth of legume and cereal seedlings and the rate of tomato ripening.

P. W. Ssawsotin reported that a low intensity (60 Oe) magnetic field may affect some biological processes as much as high intensity (1,600 Oe) magnets. Some of the effective 'windows' are quite narrow. Strekova et al. found that field strengths of about 60 Oe increased the growth rate of beans, cucumbers, lupins, maize and rye,

but the rye was unaffected by a 100 Oe magnetic field. The greatest effects were obtained at the temperatures which are optimal for the growth of each plant type. (Ref.: *Planta* 12:327.)

Soviet scientists Lazarenko and Gorbatovskaya have reported "that wheat seeds and barley seeds, premagnetised in a magnetic field of intensity 2,000 oersteds for 30 minutes, germinate far more vigorously than the control seeds. Wheat seeds and barley seeds 'magnetised' with the major axis oriented with the magnetic flux, germinate far more vigorously than seeds oriented athwart the magnetic flux, and the germination of the latter seeds is actually retarded (as compared to the control seeds)..."

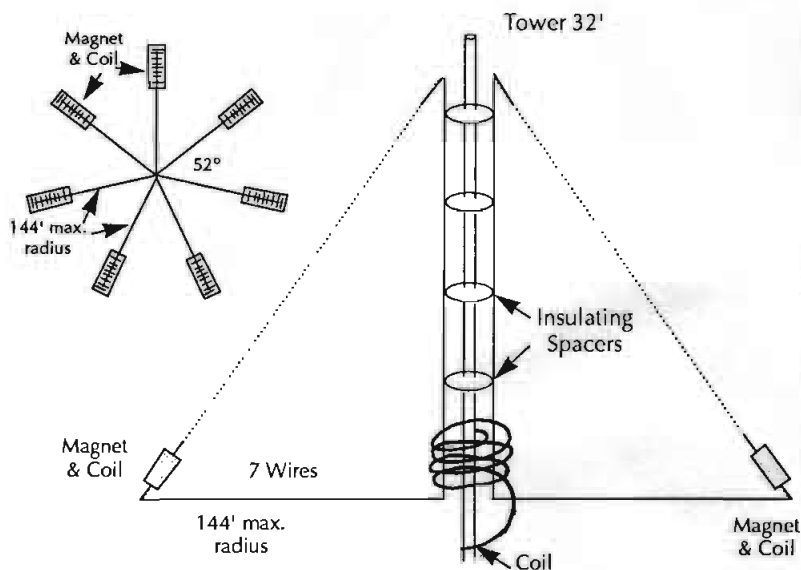

"Even more curious results were yielded by experiments in which seeds were heated in a test tube left for 30 minutes in boiling water... Compared to the control seeds, the seeds heated (in the dry state described above) and exposed to the magnetic field exhibited greater sprouting activity." (Ref.: M. A. Khvedelidze et al., *Applied Electrical Phenomena* 1(19):52-9, Jan-Feb 1968.)

However, it is possible to retard the germination of seeds if the magnetic field is too intense. V. Strekova reported on the "Effect of a High Intensity Constant Magnetic Field on Mitosis in Bean Roots". He found that four-day germination of bean seeds in a nonhomogeneous 12,000 Oe constant magnetic field causes suppression of the growth rate of the root system by up to 40%, and mutations. (Ref.: *Applied Electrical Phenomena*, no. 6, Nov-Dec, 1967.)

An excellent review of Soviet research into the "Electrical Protection of Plants against Disease" is published in *Applied Electrical Phenomena*, no. 6, Nov-Dec, 1966, pp. 454-8). The following excerpts pertain here:

"A constant magnetic field applied to cereal seeds gave the following effect: in the first variant with a constant field of 1,500 Oe and differences

Figure 5: DeLand's "Frost-Guard Tower"

in the period of exposure, the largest number of germinating seeds was found after an exposure of 10-30 and 300 minutes; in the second variant, when the exposure was constant and the intensity of the field varied, the effect again showed two maxima: the first in the region of low intensities and the second at 2,800 Oe.

"The Soviet scientist A. V. Krylov demonstrated the existence of the phenomenon of magnetotropism in the higher plants. Germination of seeds in a constant magnetic field accelerated growth of the shoots and rootlets and development at the south pole. An increase in the negative sign of polarity stimulated growth and development of the plant, while an increase in its positive sign promoted aging, disease and death. Polarity also plays a role in plant immunity. Seedlings with their rootlets turned toward the north magnetic pole were thickly infested by parasites and moulds, and the resistance of these seedlings was obviously depressed. The appearance of seedlings facing the south magnetic pole (with all other conditions the same) was completely different."

In Florida and southern California during the 1940s, orange-grower John DeLand utilised his "Frost-Guard Tower" to replace the obnoxious smudge pot system and obtained amazingly high yields from trees formerly considered too old to be productive. The DeLand Frost-Guard Tower can protect one acre of grove with its energy field, but the system will not protect small plants like vegetables from frost. (Figure 5.)

As described by George Van Tassel, "The DeLand Frost-Guard Tower is about 32 feet high. It is composed of three 12-foot lengths of standard galvanised steel pipe. The lowest section is two-inch pipe, set three feet deep in concrete. On top of this, a 12-foot section of 1.5-inch pipe is screwed on by means of a reducer. Above this, the top section of 12-foot pipe, one inch in diameter, is screwed on by means of a reducer. Resting horizontally atop each reducer and at the mast head is a one-foot diameter disc of waterproof, 3/4-inch plywood. Near the outer diameter of each plywood disc or collar are drilled seven holes. These holes are parallel to the centre mast and are equally spaced around the diameter, 51-1/2 degrees apart.

"Beginning at the top of the mast, with an extension of 6 or 7 inches parallel to the ground, #10-gauge bare copper wires are run down through the seven holes of each plywood collar. These wires are continued through the concrete foundations' outer edge. From there they branch out, in 18-inch deep trenches, to a distance of not more than 144 feet from the mast's centre. At this point, each wire is wrapped several turns around an Alnico-V permanent magnet. The end of each wire is brought above ground

and pointed back toward its corresponding other end on top of the tower. The magnet is given a coat of plastic to protect it from rust and to hold the windings in place.

"The trenches and magnets are covered with earth. The 18-inch depth is to protect the wires from cultivation; they must remain uncut if the system is to function. One wire on the tower, and hence in the earth, must point toward magnetic north. The placing of this first magnet must be done very accurately, and the others should be accurately placed.

"The magnets sets are inclined toward the mast at 34 degrees to the surface of the ground. Pointing the buried bar magnets toward the north magnetic pole, but also setting them so they point or tilt toward the central mast, gives

a skew to the flux or flow of energy.

"This system has protected groves when temperatures have fallen to as low as 20 degrees Fahrenheit. The system does not alter the air temperature in the grove. Rather, it seems to effect a condition in the plants themselves, so that lower temperatures will not induce freezing. Fruit lying on the ground will freeze, however." (Ref.: G. Van Tassel, *Proc. College of Universal Wisdom*, 1974, Big Rock, CA, USA.)

Other experimenters have demonstrated that the high-frequency currents generated by a Tesla Coil will protect plants from temperatures as low as 10°F, which destroyed unprotected plants. (Ref.: A. D. Moore, *Electrostatics and its Applications*, J. Wiley & Sons, 1972, p. 452.)

ELECTROGENIC SEED TREATMENT

During the 1970s, the technology of electro-culture became embodied and marketed as "Electrogenic Seed Treatment" by Intertec, Inc. (now out of business for reasons unknown to

The growth of plants can be strongly stimulated by sound. The effect continues above the ultrasonic threshold of 20 kHz and levels off above 50 kHz. Frequencies of 4 kHz to 5 kHz in particular have been found to increase germination, enzyme activity and respiration.

Figure 6: The Hieronymous System

this writer). Seeds were subjected to a variety of simulated atmospheric conditions that are known to benefit plant development and growth. The seeds were conditioned and rejuvenated, which resulted in more rapid germination, increased vigour and improved yields. The combined influences of the several different treatments incorporated in the Intertec machine results in a severalfold increase in plant germination, growth and yields! The inventors, A. Zaderej and C. Corson, published a description and explanation of "Electrogenic Applications to Plant Growth" (1977).

Seeds are first sprayed with a solution of minerals and enzymes which are implanted into the lipids (seed coat) by high-voltage negative-ion bombardment—a process known as electrophoresis. This accelerates chromosomal activity. A second exposure to negative ion flux increases the implantation of the nutrient solution. Then the seeds are exposed to infra-red radiation which reduces the hard-seed dormancy and increases the metabolism of ATP.

The next stage instills an electrostatic charge of cathodic protection that considerably reduces the mortality rate of seeds by providing a source of electrons to buffer the reaction with free-radical nutrient ions. Seeds must be moist when treated by cathodic protection. Dry seeds may be damaged by this treatment, but damaged seeds may be repaired somewhat if they are moist. Cathodic protection increases viability and germination up to twice that of control seeds. In an electrostatic field of 36 kV/m, the negative pole above the plant enhances germination. The positive pole above the seeds inhibits germination.

The final step also treats seeds with select radio frequencies which stress the memory of DNA molecules, charge the mitochondria and intensify other metabolic processes. Radiofrequency treatment of seeds has been found to increase

the degree of water absorption, electrical conductivity and oxygen uptake. The frequencies range between 800 kHz and 1.5 MHz with a field intensity of 3.2 watts/sq. cm.

Oddly, if not surprisingly, the seeds needed to be treated near where they were to be sown. The effects of Electrogenic Seed Treatment did not travel well, so seeds could not be shipped to it: the unit had to travel to the field.

SOUND

The growth of plants can be strongly stimulated by sound. The effect continues above the ultrasonic threshold of 20 kHz and levels off above 50 kHz. Frequencies of 4 kHz to 5 kHz in particular have been found to increase germination, enzyme activity and respiration.

Normally, the streaming movement of protoplasm in plant cells slows down in the early morning and evening, but this streaming can be accelerated by an audio frequency generator or electronic tuning fork used for 10 minutes at a distance of about five feet from the plants. The result is increased growth rate.

Moreover, plants should not be stimulated more than three hours daily during photoperiods, or the plants are rather liable to die within a month depending on the quality and intensity of the sound. The classical music of Europe and of Asia evoke the greatest response from plants. Very high frequencies and high volume cause cellular disruption and death. Rock and roll music has similar fatal effects in some circumstances. (Ref.: Dorothy Retallak, *The Sound of Music and Plants*, De Vorss & Co., Santa Monica, CA, USA, 1973.)

Dan Carlson, a plant-breeding scientist from Blaine, Washington, uses a 3 kHz tone and a foliar spray of trace minerals and amino acids in a process he calls "Sonic Bloom". [See NEXUS vol. 2, nos. 17 and 18.] Using this

combination of sound and nutrients, Carlson has succeeded in producing "indeterminate growth" in plants. His first success was with a Purple Passion house plant that normally grows only about 18 inches. Under the influence of Carlson's Sonic Bloom treatment, the 17-year-old plant eventually reached a length of 1,300 feet and earned a place in the *Guinness Book of World Records*. The process is already being used by farmers in some 30 states and at least seven foreign countries.

"I read a book that said when plants heard sound, a 3,000-cycle hum, they seemed to open their stomata, they breathed better and got healthier." To induce plants to do that, Carlson developed a high-pitched blend of natural and musical sounds that is available in cassette form for home use and as a sound box for farm fields.

For more information refer to the advertisement on this page, or write to: Dan Carlson Scientific Enterprises, Inc., W. 7964 810th Avenue, River Falls, WI 54022, USA. (Ref.: *Minneapolis Star & Tribune*, 2 September 1986.)

MONOCHROME LIGHT

Plants respond to light with a complex variety of reactions which are affected by the duration (photoperiod), intensity and wavelength of the light. The scientific literature concerning plant photoperiodism includes several intriguing reports of experiments with single colour and intermittent light effects on plant growth.

Edward Babbitt and other experimenters during the 19th century reported that under the influence of blue light, the germination period of seeds is reduced to half the usual time; plant vitality is increased, growth is accelerated, stem and leaf development are improved and yields are increased. Babbitt used stained glass filters which passed only light of the same colour as the glass.

In 1861, General A. J. Pleasanton constructed a 2,200 sq. ft greenhouse in which every eighth pane was blue. He obtained phenomenal results in terms of increased yield, improved flavour, etc., and was granted US Patent #119,242 (26 September 1871) for "Improvements in Accelerating the Growth of Plants and Animals". He recommended a ratio of eight white to one blue light for optimal plant growth, and a ratio of 1:1 for best animal development. Blue light stimulates the directional response of plants to light. Plants' stomata open more widely in the presence of blue light. Evaporation and photosynthesis are intensified and chlorophyll production is accelerated. However, some cells may rupture, and mitosis may be inhibited.

Recent experiments have shown that the helium-neon laser (632.8 nm) can influence the phytochrome-controlled germination, growth and development of plants from a distance of more than a quarter-mile. The maximum effect is obtained by one or two minutes of exposure to reflected laser light. More than ten minutes of irradiation will inhibit the phytochrome response. In some cases, successive nightly irradiations at low intensity have significantly greater effect than a single exposure of greater length or intensity. The response can be reversed by alternating exposure to the laser and far-red light. (Ref.: L. G. Palea, *Nature* 228:970-3 (1970).)

Far-red light can be used to increase the growth of some plants (such as beans) up to ten times the normal rate by increasing phytochrome activity. Red light at 660 nm stimulates growth, development, flowering and fruiting. When red light at 700 nm is available with 650 nm red light, photosynthetic activity is considerably greater than with either single

The Healing Power Of Magnets

**For hundreds of years,
observations have been
made about the
therapeutic effects of
magnets.**

**Even the FDA has moved
to classify the application
of static magnetic fields
to human diagnosis and
therapy as "not
essentially harmful".**

RESEARCH IMPLICATIONS FROM CLINICAL OBSERVATIONS

Implications for definitive controlled research stemming from objective research observations and single case anecdotal clinical observations are suggestive of the following:

1) Determine the pH shift during deliberate test exposure to foods, chemicals and inhalants.

Clinical Observations: Testing saliva pH before and one hour after food test meals demonstrates a consistent pattern of acidosis when symptoms occur.

2) The degree of intactness of pH buffer system during exposure to the positive magneto-electric fields and separately to the negative magneto-electric fields.

Clinical Observations: The negative magneto-electric field is observed to relieve the acidosis and symptoms occurring from maladaptive reactions to food, be these immunologic or non-immunologic, and has not been observed to lead to any evidence of over-alkalinisation.

3) The degree of reversibility of insoluble gels produced by a state of acute acidosis¹⁰ when exposed to a negative magneto-electric field.

Clinical Observations: Symptoms of cardiac atherosclerosis and symptoms of brain atherosclerosis have been observed to disappear after six to eight weeks of nightly exposure to a negative magneto-electric field. Is this evidence that the insoluble gels are undergoing resolution?

4) Degree of oxygenation and oxidation metabolism of tissues during exposure to a negative magneto-electric field.

Clinical Observations: A man in his sixties began to have pain in his heart. This was diagnosed as arteriosclerosis of the heart. He was given a number of EDTA chelations. In spite of this, by age 70 he was having so much pain in his heart that he underwent cardiac bypass surgery. He did fairly well for two years, but by the age of 72 began again to have pain in his heart, and this time he was also having difficulty with mental function. He was getting lost in his own neighbourhood. His gait was shuffling and he would stumble. His speech was thick and could hardly be understood. He was in a state of depression. At age 74, he decided to give magnetics a trial. He placed over his heart a plastiform magnetic 3" x 4" x 1/8". Within ten minutes there was no pain in his heart. He began sleeping with magnets at the top of his head. Within a week he was markedly improved. At one month he was observed to be outgoing, not depressed, speech was clear, he was not shuffling and stumbling and was not getting lost in his own neighbourhood.

The fact that the symptom of pain in his heart was relieved within ten

minutes is suggestive that oxygenation and improved oxidation metabolism of the tissues of the heart had occurred. His rapid improvement of the mental function and affect could also most likely be explained by oxygenation and improved oxidation metabolism occurring before there is any evidence of resolution of atheromatous plaques.

5) Degree of antibiotic effect of micro-organism infection during exposure to a negative magneto-electric field.

Clinical Observations: a) A man with a toothache and a periodontal abscess exuding pus, obtained relief from the pain within ten minutes of exposure from the negative magneto-electric field of a static magnet. Magnets were left on the infected area for four days, at which time he was examined by a dentist and no infection was found.

b) A woman with candidiasis of the vagina obtained relief of the symptoms and evidence of the fungal infection dying out when daily sitting on the negative magneto-electric pole of a static magnetic field.

6) Degree of electrical control of brain electrical activity during brain exposure to a negative magneto-electric field.

Clinical Observations: a) A man whose initial psychosis was precipitated by exposure to pesticides and carbon exhaust was hospitalised for a period of two months. He was well for a period of eighteen years. When re-exposed to a massive dose of petrochemicals, he again became psychotic. The negative magneto-electric fields of magnets were placed bitemporally, and within ten minutes he was sane and had dropped his delusions that someone was seeking to kill him.

b) A teenage girl with a schizo-affected psychosis had

attempted suicide. The parents reported the observation that after eating wheat she would be depressed and socially withdrawn to her room for a period of four days. A test meal of wheat evoked depression, a flat affect, headache, stomach ache and social withdrawal. Forty-five minutes of negative magneto-electric energy applied to her spine and head produced a deep sleep and a complete reversal of her symptoms. Exposure of her head to a negative magneto-electric field ahead of a test meal of a symptom-evoking food, prevented the reaction from occurring.

c) A teenager with temporal lobe confusion-type seizures, evoked during a deliberate food test meal of eggs, had no seizure on a subsequent test meal of eggs when negative magneto-electric pole of magnets were placed on the temporal areas.

7) Degree of melatonin production by the pineal gland during sleep with the crown of the head exposed to a negative magneto-electric field.

Clinical Observations: A man in his 70s, while sleeping with magnets at the crown of his head, slept more soundly and ceased having sleep apnoea. This could be considered significant because sleep apnoea has been demonstrated to be a melatonin deficiency.

8) Degree of growth hormone rise during sleep when the crown of the head is exposed to a negative magneto-electric field.

Clinical Observations: a) A man in his 70s, sleeping with magnets at the crown of his head, has to cut his fingernails once a week whereas, before treatment, it was once every six

weeks and he has to get his hair cut twice as often as before magnetic treatment.

b) A woman in her 70s, sleeping with magnets at the crown of her head, had a change in the hair on her head from brittle to normal, and regrowth hair on her legs and under her arms which had virtually disappeared after menopause.

Growth hormone is in control of the growth of hair, nails, and skin.

SUMMARY OF MAGNETIC RESONANCE THERAPEUTIC RESEARCH PROJECT NEEDS

Acute maladaptive reactions, both immunologic and non-immunologic, are cellularly acidifying. Chronic metabolic illnesses are cellularly acidifying. A negative magneto-electric energy is normalising for cellular pH and thus valuable in both acute and chronic symptom relief. Hypoxia is present in acidic states and thus present in acute and chronic symptoms. Negative magneto-electric energy is oxygenating and oxidating, as well as being a free-radical scavenger. A negative magneto-electric field energy raises melatonin production by the pineal gland. Melatonin has a master control over the entire energy system of the human body. A negative magneto-electric energy field gives evidence of being a universal antibiotic. How effectively can magnetic resonance therapy reverse viral infections, bacterial infections, fungal infections and parasites? How effectively can magneto-electric field energy reverse degenerative diseases such as maturity-onset diabetes mellitus and its complications, chronic inflammatory and/or autoimmune diseases (arthritis, myositis, fibrositis, scleroderma, lupus, etc.)? How effective can magneto-electric field energy be in treating a host of physical and mental

illnesses? Anecdotal clinical cases indicate these questions deserve to be answered. It is the aim of the IRB [Institutional Review Board] of BEMI [Bio-Electro-Magnetics Institute] to answer these questions.

The production of magnetic resonance requires the presence of a pulsing frequency.¹¹ In humans, the pulsing frequency is provided by the brain. Sleep, with its increased microvoltage amplitude during pulsing frequencies, is the optimum generator of biological electromagnetic energy produced by magnetic resonance. Three methods are available to increase electromagnetic energy production during sleep in humans: (1) externally increased magneto-electric energy field from the negative magnetic field of a static-field magnet; (2) external source of pulsing frequencies increasing the amplitude of pulsing frequencies occurring during sleep; (3) combining (1) and (2) provides optimum building of electromagnetic energy fields for the brain which in turn governs the electromagnetic fields of the body.

THREE EXPERIMENTS ON 'FREE ENERGY'

Part 2

© Harold Aspden, 1993

THE SOLID-STATE ENERGY PROBE EXPERIMENT

The third experiment which tells me that I am on the verge of a breakthrough in penetrating the barrier giving access to 'free energy' in a solid-state device has yielded its own surprises.

Here I built a form of transformer that is intended to serve as an exploratory test rig. I shall, owing to the developing length of this communication, curtail the constructional details and leave something for future reporting.

The test involved setting up a DC magnetic bias in the x-direction and an AC transverse magnetic oscillation in the y-direction. Again I used the above-described technique of studying the shape and form of the B-H loop developed by the AC flux.

The AC excitation was of low magnetic flux density amplitude so that the eddy-current losses should be negligible, as should hysteresis loss. I was operating in the flux rotation zone and above the B-H knee where rotational hysteresis loss diminishes rapidly to zero. I expected the B-H 'loop' to show as a line on my oscilloscope and, indeed, such a line did appear. I had to expand it off the range of the screen by increasing the x deflection sensitivity substantially in order to trace the small capacitive contribution of my circuit for integrating induced EMF to derive the B signal. I could find no trace of a loss. Moreover, the line was not curved: it was very straight, which meant that the incremental permeability effective in the direction transverse to DC polarisa-

tion was virtually constant.

This was as expected from my theoretical reasoning, but there was a surprise in that the transverse permeability was smaller than I expected, by a factor of ten.

Now, if you are wondering what this means, note that my object is to store 'reluctance' energy by that transverse excitation, meaning energy that goes in as inductance energy and is recovered without loss on the down quarter-cycle. By making that transverse oscillation stronger and stronger, the object is then to deflect the primary polarisation so that the intrinsic ferromagnetic power develops flux oscillations in the axis of the primary coil. The aim is to tap energy from that deflected 'reluctance' energy source, most of which is powered by the atomic spins in the ferromagnet, and use that energy on the up quarter-cycle.

This process then allows the polarising bias, which could be that provided by a permanent magnet, to reset as the transverse current diminishes, but the shortfall in the stored 'reluctance' energy given back to the magnetising coil in that transverse direction has then to be made up by the magnet.

The experiment I report here goes no further than showing that the transverse excitation is a pure, virtually loss-free, inductive process which involved a characteristic magnetic permeability indicating a 30:1 ratio of ferromagnetic power input compared with external power input. That is the starting point which will, I am sure, lead to the fourth

experiment in which that energy is diverted and used without affecting the input magnetisation circuit. Then the recovery of energy upon demagnetisation of that latter circuit will occur, but as it cannot take used energy back from a load, the polarising magnetic source simply has to do the work and so leave the quantising vacuum field in a cooler state.

Rather than wait until I am ready to report such further progress, I thought it appropriate to inform you and, via you, the readers of your newsletter at this stage.

CONCLUSION

In summary, just as with the reluctance motor, one seeks to use a magnet to inject inductive energy into an air gap and then release that energy as mechanical work as the air gap closes, before

switching the magnetic interaction off; so, with the x-y system, the object is to (a) promote interaction between the x-field and the y-field to set up an energy potential at a threshold level, (b) trigger the release of that energy to a coil on the x-direction connected to an output load, and (c) allow the x-field to recover by drawing on the vacuum energy system before reactivating the interaction with the y-field.

I shall now be taking this research forward to reach that ultimate objective of generating energy output by tapping the action that powers ferromagnetism, but I hope you and your readers will understand why I have written this letter.

I want to bridge the credibility gap between those who claim the 'impossible' and those who decry those claims. In the middle ground there are simple laboratory experiments to be performed to show the physical basis that underlies what is claimed. Once one gets beyond such laboratory experiments and into technology, one has entered the realm of confidentiality and proprietary information that restricts communication. If the academic and university world, in its educational role as the fountain of knowledge, stands aloof because 'free energy' is seen as 'impossible' or actively resist attempts to find funding for such research, then we confront a sorry and unhappy situation. My plea, therefore, addressed to anyone who can understand how a transformer works, is to repeat the middle experiment report-

ed above [see NEXUS vol. 2, #18] and see for one's own self that the academic world has buried its head in the sand in a desert that so needs the benefit of over-unity reluctance motor technology.

This letter has become too long and you may wonder why I am addressing it to you in this way rather than writing it as a formal paper. I suppose my reason is connected with your personal efforts to arouse the interest by writing to Al Gore, the Vice-President of your country. He did not address your concern about the USA missing out on the 'free energy' front. I see that in his reply to you dated 24th June 1993, which you included in your September 1993 newsletter, he preferred to emphasise how a new generation of educational computer hardware and software can make that revolutionary difference in the classroom. To sum this up, he is telling you that technology is new if it helps to teach old technology in a different way. With the right computer software we can all become better educated and share the same knowledge, well-formulated and fully in compliance with standard convention.

This is what is so sad about the modern computer age. We have so much information at our fingertips by pressing the buttons of a keyboard, but I do not believe that any of that vast store of computer data could provide the inspiration needed to see the need for the three experiments I have reported above. So much of the brainpower of the quality that can understand magnetism and see

its potential for solving our energy problems has, in fact, gone into computer pursuits, whilst the primary electrical power technology has, for its new ideas, degenerated into historical investigation of unsolved mysteries from the Tesla era. Perhaps, if I had not myself been drawn into the computer industry owing to the declining opportunity for engineering talent in electrical power technology, I might even have contributed to the energy revolution at an earlier date. As it is, I am expecting to find that Hans Coler proves to be the champion in the historical contest for 'free energy' fame, and I am wondering how those who write the history explaining why Coler's work was treated as an 'official secret' will express their findings in that educational computer of the future.

POSTSCRIPT

As I am receiving too many requests for information about the research project I follow and the costs involved are escalating, I shall be publishing a sequence of reports under the 'Energy Science' banner and supplying these for a nominal charge. My plan is to interest readers also in the theoretical groundwork of understanding the vacuum medium which powers the ferromagnet. To this end, and so long as limited supplies last, I offer to anyone who now purchases, directly from me, a copy of my book *Modern Aether Science* to follow surface mail, delivery of that book with a complimentary copy of the first report giving full details of the above experiments, including the mathematical analysis and data. Payment of £15 in pounds sterling (payable to Sabberton Publications) or USD\$25 by cheque drawn on a US bank (payable to Harold Aspden) is required. Address:
Sabberton Publications
PO Box 35
Southampton, SO9 7BU, UK.

This article is extracted from an open letter written to Donald A. Kelly of The Space Energy Association, PO Box 11422 Clearwater, Florida 34616, USA, for inclusion in the Association's quarterly *Space Energy Newsletter*.

NEWSCIENCE NEWSCIENCE

INSTITUTE FOR NEW ENERGY —INTERNATIONAL REPORT—

by Toby Grotz

The following report describes the state of the art in Space Power research around the world. The trip was made in November and December 1993 to researchers in Australia, New Zealand, Japan, India, Austria, Switzerland and England. The purpose of the trip was to find and encourage inventors and researchers to bring their hardware to the Second International Symposium on New Energy, to be held 13th to 15th May 1994 at the Denver Hilton South. (For more information about the Symposium, contact *New Energy News*, Salt Lake City, (801) 583 6232.) The trip produced 13 rolls of film and 15 hours of videotape. The inventors and researchers are listed below with a short description of their work. We found that Space Power Generators are on the way to becoming a reality. Several systems are ready for commercial application and are in the process of raising funds for manufacturing or are seeking licensing agreements.

Bill McMurtry

Bill has built several Pulsed Electric Motor Generators (PEMG), also known as the Adams Motor. He first became interested in the Adams Motor after reading about it in NEXUS Magazine. We were able to photograph and videotape his latest model which runs between 200% to 300% efficient. Efficiency tests were conducted with a pony brake and with oscilloscope and instrumentation described in the Adams Pulsed Electric Motor Generator

Manual published by NEXUS Magazine.

Bill is an Australian with a background in electronics, graphic art design, and physics. Bill has not published any papers and refers those wishing to duplicate the Adams machine to the diagrams published in NEXUS and in the PEMG Manual.

Bill has joined the firm of Robert Adams Developments Limited as an associate.

Contact: Bill McMurtry, 11 Kintore Street, Annerley, Qld 4103, Australia.

Bruce DePalma

Bruce DePalma is the inventor of the N-Machine and coined the term in reference to the "nth degree". N-Machine technology involves Rotating Magnetic Fields and Inertial Field Disturbance. DePalma claims that others have pirated his work: Adam Trombley, et. al., took out a patent, and a current investor has also applied for a patent without his permission, after confidential details were disclosed.

Bruce is a graduate of Harvard and MIT, and has a B.Sc. in physics and electrical engineering. At MIT he worked with Doc Egerton, founder and CEO of EG&G, and with Edward Land of Polaroid Corp. During his stay at MIT he taught electrical engineering classes and managed a research lab. Major influences have been the work of Egerton, Land, Tesla and Faraday. According to Bruce, the operation of the N-Machine is put into simple terms by saying that "Rotating magnetic fields disturb the fabric of space (ether)".

Bruce has written and presented many papers, and an extensive bibliography

details his experiments with rotating gyroscopes, spinning ball-bearings, tuning forks and Accutron watches subject to magnetic field influence. A book describing his work and a videotape will be available soon.

Present efforts have produced a compact N-Machine about 2 cubic feet in volume, weighing about 300 pounds, capable of 100 kW output at speeds up to 18,000 rpm. The rotor uses two 3-inch diameter by 3-inch-long neodymium iron boron magnets and mercury brushes. Current plans are to sell this model as a research tool to universities and free energy researchers interested in studying the N-Machine effect.

Contact: DePalma Institute, Private Bag 11, Oerere Point, New Zealand.

Floyd "Sparky" Sweet

Sparky Sweet is an electrical engineering graduate of MIT. "Sparky" is a nickname he received during his days at General Electric as one of their top technicians.

Sweet's device is called the Vacuum Triode Amplifier (VTA). It is a solid-state f/e device, and incorporates bifiler coils, magnets and motional fields. The VTA is the most powerful as well as the most well-documented of recent solid-state Space Power Generators with a gain of 2,000,000. One version of the VTA consists of 4 x 6 x 1-inch magnets with bifiler and solenoid coils between the magnets. A videotape produced in 1987 by Tom Bearden and Sparky Sweet, and shown widely at recent conferences, shows a meticulous array of instruments on the input and output. The input is stimulated by a 10 volt, 60 Hz, 300 microwatt signal. The output is

NEWSCIENCE NEWSCIENCE

a 120 volt, 60 Hz, 600 watt output, lighting five 100-watt incandescent lamps, driving a table fan, stepped down to 24 volts AC and rectified to power a DC motor and several light bulbs.

The video also shows that likes attract, in contradiction of standard physics but in vindication of the words of Walter Russell. A specially modified TV set is used to show the magnetic lines of force of magnets placed against the screen. As shown on the video, so-called flux lines link together when like poles are placed opposite each other—the exact opposite of what is seen when using iron filings. Sparky has written several papers concerning the technology that may be involved in Space Power Generators. The most intriguing paper is titled "Something is Nothing". The Institute For New Energy hopes to publish this paper at a later date.

Sparky continues to improve and refine his systems as well as conduct research in medical fields of interest.

Robert Adams

The Adams Motor can be described as a switched, variable-reluctance pulsed magnetic motor, with reported efficiencies up to 2,000%. Formal reports from a Ph.D. Systems Engineering scientist in the United States show a VAX computer system analysis of 1,254% efficiency. While we were in Whakatane, we videotaped and photographed pony brake tests on a model that demonstrated 400% efficiency. The Adams effect was first noted by Mr Adams 27 years

ago when he was trying to develop methods of overcoming the inefficiencies that cause drag, heating and other losses in motors.

We were able to see the first unit he built as well as numerous models built since his first discovery. One Adams Motor operates a small table saw. Motor sizes range from a few to several hundred watts.

Although he was over overwhelmed by opposition for 27 years, from the Prime Minister of New Zealand (Muldoon) on down, Adams has come out on top as his motor and test results are being verified worldwide. It is interesting to note that Mr Adams told us that, until he published the NEXUS article, he was totally unaware that there was a worldwide network of free energy researchers. We wonder how many other inventions are currently waiting to be discovered.

Robert Adams founded the New Zealand chapter of the IEEE in May of 1968. This is somewhat ironic as the IEEE is sure to resist accepting the Adams effect in much the same way that they have resisted recognising the achievements of Nikola Tesla. It is the opinion of Adams that Space Power is coupled into the system through the core of the stator at the time of the reversal pulse. A full understanding of the machine operation can be found in the Adams Pulsed Electric Motor Generator Manual published by NEXUS Magazine. This Manual details the construction of the machine and has

allowed many people to report duplication and verification of the Adams report.

The device consists mainly of a rotor with four magnets, four relay coils, a battery and a commutator. An understanding of the theory can also be had by reading the work of Harold Aspden that has appeared in NEXUS (see vol. 2, no. 18, and this

issue) and in other issues of *New Energy News*.

Harold Aspden is also an associate of the company recently formed by Adams, and is helping with the patent process of new embodiments. The Adams Motor also involves the anti-Lenz effect as described by Stefan Marinov in his paper "The Generator 'Venetin Coliu' Produces Free Energy", published in the *Proceedings of the International Symposium on New Energy*, April 1993, available from the Institute For New Energy, 1304 South College, Fort Collins, CO 80524, USA. **Contact:** Robert Adams Developments Ltd, 46 Landing Road, Whakatane, New Zealand.

Yull Brown

Yull Brown is the Bulgarian inventor of a welding process using a stoichiometric combination of hydrogen and oxygen as a gas. The flame from the welding torch using this gas has a relatively low temperature. During the demonstrations that we witnessed, we were able to pass our hand through the flame, an act unthinkable with an oxy-acetylene torch. That same flame will, however, fuse steel rod to fire brick and melt tungsten and titanium. The gas, known as Brown's Gas, involves the technology of implosion, and possibly transmutation to produce enormous heat and anomalous and spectacular effects. As an editorial aside, this writer suggests that a Brown's Gas welder and gas generator should be a part of any alternative energy research lab.

The equipment that Yull Brown has developed uses electrolysis to break water into hydrogen and oxygen. The gases are kept under pressure in a mixed state. This eliminates the risk of explosion because, when ignited, these gases implode and form water. The Institute For New Energy hopes to have demonstrations at the next Symposium in May. **Contact:** Brown's Gas International, 5063 Densmore Avenue, Encino, CA 91436, USA.

Dr Shuiji Inomata

Inomata's Vacuum theory redefines Dirac's theory as a balanced sea of both positive and negative "shadow" energy of infinite depth. Dr Inomata has worked for the government-funded

NEWSCIENCE NEWSCIENCE

Electrotechnical Laboratory (ETL) lab since he was 22 years old. He is a graduate of the University of Electro-communication and received his Ph.D. from the Tokyo Institute of Technology. His theory includes consciousness in the equations of physics. The N-Machine project is funded by the government of Japan. The Electrotechnical Laboratory houses some 500 researchers and 200 support personnel. The lab is the Japanese equivalent of the US Bureau of Standards and The Electric Power Research Institute (EPRI). ETL is funded by the Ministry of Finance through the Ministry of Industry and Trade International (MITI). ETL is currently negotiating with MITI for several million

dollars to be spent on a new superconducting N-Machine. Dr Inomata is confident that funding will be provided because all members of Japanese society, including the finance ministers, understand the principle of *Ki* and accept as fact that this world is formed from this primary substance of the universe. (*Ki* may be described as the universal energy that gives birth to all things. *Ki* in Japan is pronounced 'key', as opposed to the Chinese word *Chi* pronounced 'chee'.) Papers on his theory of the energy extraction have been presented at the 26th and 27th IECEC conferences.

As described in his papers, excess energy is observed during tests of the N-Machine. The original impetus to inves-

tigate the over-unity phenomenon came from battery-charging anomalies during ETL tests in 1980. These tests used a 100 kV DC supply to effect rapid charging of lead acid batteries for use on electric-powered bicycles. Car batteries were also used. Presented papers describing this effect reported the observation of battery charging in excess of power supplied to the battery. The same effect has also been reported for high voltage pulsing of batteries.

Continued in the next issue of NEXUS...

LOST LAND OF THE LIZARD PEOPLE

by Robert Stanley

In the summer and fall of 1933, a Los Angeles mining engineer named G. Warren Shufelt was surveying the L.A. area for deposits of oil, gold and other valuable materials, using a new device which he had invented. Shufelt had designed and built a radio-directed apparatus which he claimed was able to locate gold and other precious resources at great depths. He believed that the radio device worked on a newly discovered principle involving electrical similarities of matter which had the same chemical, physical and vibrational character. His device appeared to consist of a large pendulum suspended in a cylindrical glass case which was housed in a black box with compasses on it. The pendulum would trace a line directly from a piece of ore broken from a vein to the vein it was originally taken from. Hair taken from a test subject would lead investigators to the person who had donated the hair sample. It was said to have worked even at a distance of many miles. Although he would not tell exactly what was in the box, Shufelt

believed that by tuning into the individual frequency of a particular material, he could locate similar matter. He believed that the emanational and gravitational factors of matter influenced the pendulum and that, in principle, no two separate things were exactly alike.

Shufelt was extremely puzzled when one day, while taking readings near downtown Los Angeles, his instruments showed him what seemed to be a pattern of tunnels which led from what is now the Public Library in the heart of L.A. to the top of Mount Washington and the Southwest Museum to the north in Pasadena. He proceeded to draw a map and had it copyrighted. What he discovered appeared

to be a well-planned underground labyrinth with large rooms located at various points, and deposits of apparently man-made gold in the chambers and passageways. Some of the tunnels ran west for 20 miles under the Santa Monica Bay, which he believed were only used for ventilation. Unfortunately, Shufelt had no idea that

THE TWILIGHT ZONE

they were connected to the older ruins of an even greater city which was covered by the Pacific Ocean thousands of years ago during a tremendous earthquake and subsequent flood. The subterranean complex he had discovered was used for emergencies and was only designed to accommodate 5,000 people or less. Food supplies of imperishable herbs were stored in sufficient quantities which would enable the survivors to live underground until it was safe to come back to the surface. Valuable personal belongings and utensils were also brought into the complex along with historical records and gold treasures.

During his research, he met a Hopi Indian named Chief Little Green Leaf, who told him about the legend of an ancient race of "Lizard People". The legends said that about 4,000 to 5,000 years ago, an enormous meteor shower fell on the western coast covering an area hundreds of miles wide. Winslow crater in northern Arizona is only one of the pieces that fell from the sky at that time. Thousands of people were killed, their crops wiped out, dwellings destroyed, and the forests set on fire. The surviving members of the medicine lodge, which had remained on the west coast, met to make plans for constructing safe areas. The sentinels of the sky

gave their warning that it was time to enter the shelters and seal the shafts behind themselves. They were forced to go underground to save themselves from a gigantic meteor shower which devastated most of the west coast of the US. The

"Lizard People" of Los Angeles survived the meteor shower, but were killed by natural gas leaking into their bunkers. Shufelt believed that they had built 13 such underground facilities in different areas for such a purpose. One was located in the eastern section of Arizona in a small town called Springerville and was only discovered recently. Another was located under a hill which was surrounded by a curving ridge of mountains like the middle of a horse's hoof. This is exactly the type of terrain seen in downtown L.A. in the

Reference:

Walton, Bruce, *Mount Shasta, Home of the Ancients*, Health Research, Mokelumne Hill, California, 1985.

View of downtown Los Angeles, which mining engineer Shufelt believed to be the lost city of gold dug 5,000 years ago by the "Lizard People".

area that is now the Board of Education, which is built over the ruins of the old Willis Estate on top of Fort Moore hill. Shufelt and his partner Chief Little Green Leaf were both convinced that the ancient legends and the readings from Shufelt's mystery machine were true. They decided to obtain a permit to sink a shaft down into the ruins of the subterranean city. They located a vacant lot at 518 North Hill Street, directly above one of the largest rooms. On 21st February 1933, the County Board of Supervisors

approved a contract with Rex McCreary, Warren Shufelt and Ray Martin to search for buried treasure there. The permittees were to bear all expenses, to leave the property in its original condition, and to share 50% of all discoveries and treasure with the city of L.A. The county originally only allowed them to dig up to depths of 50 feet for fear of cave-ins. On 27th March 1933 they requested additional time and depths on their permit, believing that the labyrinth of tunnels was at least 1,900 feet in length, with rooms containing 9,000 square feet which contained valuable gold treasure in at least 16 places. On 10th April 1933 the contract was renewed. By the end of November in 1933, the main shaft was at a depth of 200 feet. Shufelt was determined to drill to a depth of 1,000 feet if necessary. On 29th January 1934, the first stories regarding the legend of the "Lost Land of the Lizard People" made the L.A. newspapers. By this time, one of the five shafts was already 250 feet deep.

According to the legend and the radio surveys, the underground city was laid out in the shape of a lizard, with its tail under the Main Library at Fifth and Hope, and the body extending north-east, with the head being at Lookout and Marda near North Broadway. The key room to the city was located under Second and South Broadway. The legends state that the key room is the directory to the rest of the city, and to the historical gold record tablets. These gold tablets were slabs of gold, 4 feet long and 14 inches wide. The tablets

were believed to contain the records of the origins of the human race, and the history of modern man in the Americas, including details regarding the history of the mysterious Mayan people.

Shufelt's radio-wave machine mapped the rooms and tunnels as subsurface voids, with the gold slabs as dark areas, showing perfect geometric angles. The rooms, seven of which occurred within an area of six square city blocks, varied in size from 23' x 23' to 34' x 42'. The room below the first shaft was 31' x 42', and the key room was the smallest. Water had seeped into some of the tunnels, and several of the rooms including the largest were flooded. Shufelt was prepared to use divers to explore the submerged areas when they finally broke into the subterranean city.

Chief Little Green Leaf claimed that the "Lizard People" had been able to predict earthquakes and that he had also been able to do so. He had accurately predicted the destruction of the Long Beach quake on 10th March 1933, a month in advance. He believed that it

was easy for anyone to tell 96 hours in advance when an earthquake was coming, because the needle on a compass would become demagnetised and refuse to point north.

By the beginning of February 1934, the first shaft had reached a depth greater than 250 feet and was still being dug, despite difficulty caused by the water encountered in its path. Several newspaper articles featured updates on the project. Shortly after all the media attention was focused on this search for the lost city under L.A., the project was suddenly stopped and abandoned. On 5th March 1934, the shafts had been filled in and the contract with the city was cancelled. Neither gold nor any other treasure was ever turned over to the County of Los Angeles.

Mr Arche Dunning of the Los Angeles Chamber of Commerce stated in December of 1947 that, "It is quite possible, of course, that the supposed labyrinth really exists. But in view of the fact that the overlaying area is the immediate Civic Center area where an

important building program is to be carried out, including federal, state, county and city building, there is little probability of any further excavations." This is really not a true statement because it is necessary to excavate many hundreds of feet into the ground before a high-rise building can be constructed. Also, one should consider that sewage systems are all underground. And let's not forget the new Metro Rail System, which rises up from many feet below the Civic Center before it speeds commuters on their way. Long ago even the Chinese dug tunnels around the area which is now the train yard. These red brick subsurface tunnels were used for their safe passage from one end of Old Chinatown to the other and are now an historic landmark found preserved at Alvera Street.

It is quite possible that there is another city below the L.A. Civic Center which only a small number of people have access to. The question is, who?

THE TWILIGHT ZONE

TINY ENTITIES IN MALAYSIA

Several students of the Sultan Sulaiman Primary School in Kuala Terengganu, north-east Malaysia, claim to have encountered a group of tiny people on the school premises on 12th and 13th May.

The news of the meeting with the small entities caused much excitement among the students and the 41 teachers of the school when the children reported their experiences, which had been at about 3.00 pm, during the school's recess time, on the two days in question.

Mohamad Izainurie Nor Zaidi, aged 8, a second-year pupil, claimed that he had tried to catch one of the little creatures and that it had "stabbed" his hand, leaving a bruise. When he was asked by the school authorities to show his left hand, he did so, displaying a tiny wound.

This boy (who is the elder son of the Terengganu soccer team's Malaysia Cup Captain, Norzidi Mohamad) explained that he was playing with other children on the playground and that, when he approached the outer fence, he saw "hundreds of tiny people coming out of a hole

near the drain of a housing estate". He said he could see, perfectly clearly, the faces of the tiny folk, which were dressed in red and about 6 cm in height.

He said that on the same day he had also seen another little creature emerge from a hole at the foot of a tree.

Another second-year child, a girl named Hafiza Zakaria, also aged 8, claimed likewise that she had seen tiny people near the drain in the school compound on the previous day. This had been during the recess period, and another girl with her had also seen them. She told her teacher about it, and took her to see the spot where she said the tiny creatures had been.

Another girl, Yasmin Hadyah Yyuri, daughter of an architect and aged 10, said she too had seen the tiny people.

However, no adults—but only the schoolchildren—had seen the little beings.

The school has a total of 930 children. Almost all of those who claimed having seen creatures said they had seen them near the drain, or near the tree, or in the vicinity of a nearby mosque.

When questioned about it, the afternoon

supervisor at the school confirmed that the children had indeed claimed to have seen tiny creatures.

FLYING SAUCER LANDING

A flying saucer, believed to be from an alien planet, was seen to land at Kampung Parit Rambai, near Pontian, several nights ago. It caused a commotion amongst the inhabitants, and has been the main topic of discussion there.

The flying saucer was said to have measured about the size of a volley-ball. It touched down momentarily and caused a group of drummers who were practising that night to break off playing.

Haji Yahya Hashim, who was one of the group, saw a bright light, and then, several minutes later, the object landed not far from them. In shape it had the usual flying saucer form. However, it took off again before anybody got the chance to approach and observe it closely.

PHOTOSONIX™ NOVA

Price: AUD\$595.00

Available: Vibrance—Australian Medical Research Pty Ltd, PO Box 1352, Burleigh Heads, Qld 4220, Australia; phone (075) 92 4104, fax (075) 92 1191.

Wow! What an amazing machine! I decided to give this device its first test one evening close to deadline, at a time when I was getting quite tired.

The machine lives up to its claims. I selected programme #06, which is among the "general tune-up" range of settings, and is designed to energise you.

Not knowing what to expect, I gingerly strapped on what is considered by many to be the Harley-Davidson, or Rolls Royce of the 'mind machines'.

For the uninitiated, you are basically putting on a headphone/eye goggles combination, which pulses sound and flashes red/green light at you.

It is well-known that the human brain is quickly entrained, that is to say that brainwaves synchronise to that of any regular overriding external input—in this case, flashing lights and sound at precisely measured beats.

The results I felt afterwards were instant and very noticeable: I felt absolutely wonderfully clear and focussed.

This particular model has a range of 50

pre-set programmes, plus it allows the dedicated users among you to design your own programmes.

The accompanying manual is very explanatory and thus the NOVA is easy to use.

The NOVA is used for relaxation or stimulation, meditation, visualisation, or for inducing out-of-body states (with some people anyway).

Lists of frequencies, accompanied by descriptions, allow you remain totally in control of your journeys.

Caution: Persons subject to any form of seizures or epilepsy, using a pacemaker, or suffering from cardiac arrhythmias or other heart disorders, should not use the NOVA without medical supervision.

BOOKS

CASEBOOK ON ALTERNATIVE 3 UFOs, Secret Societies and World Control

by Jim Keith

Published by IllumiNet Press (1994), PO Box 2808, Lilburn, GA 30226 USA ISBN 0-9626534-9-7

Price: AUD\$26.00, (160pp, p/b)

Available: NEXUS Magazine, PO Box 30, Mapleton Qld 4560, Australia; phone (074) 42 9280, fax 42 9381.

Hopefully by now you will have read the article starting on page 27 of this issue, which is basically a complete extract of

Chapter 3 from this book.

To recap on *Alternative 3*: In 1975, the normally conservative television programme, *Science Report*, broadcast the most shocking investigative story ever shown on British television—an international conspiracy of monumental proportions with the code-name *Alternative 3*.

Among the allegations of *Alternative 3* are: that the rich elite of the world have initiated a secret space programme to escape the coming environmental and natural disasters; that joint American-Russian bases exist on the Moon and Mars; that UFOs are actually secret government aircraft utilising technology far beyond what we are told; that top scientists around the world have been recruited to these space bases; and that innocent civilians are being kidnapped and subjected to mind control to serve as zombie-style slave labourers at these secret bases.

This book is certainly an excellent compilation of research on topics alluded to in the classic book, *Alternative 3*.

PASTEUR EXPOSED: GERMS, GENES, VACCINES—The False Foundations of Modern Medicine

by Ethel Douglas Hume

Published by Bookreal (1989), 8 Millar Street, Denmark WA 6333, Australia

Price: AUD\$unknown (260pp, p/b)
Available: From the publisher.

This is a very important, often referred to, and old book which exposes Pasteur

REVIEWS

BOOKS

for who he really was. It was written by Ethel Douglas Hume and was first published in 1923 under the title, *Béchamp or Pasteur?* The author has sought to present the much-suppressed work of Professor Antoine Béchamp, and therefore show Pasteur and his ideas as being those of a charlatan and plagiarist.

It was Dr Montague R. Levinson who started the inspiration for the writing of this book. While Béchamp was still alive, he happened to come across his writings. So greatly did he become imbued with the views of the French Professor that he seized the first opportunity to travel to Paris. He was fortunate enough to arrive some months before the death of the great scientist and to receive from him, in person, an account of his discoveries and his criticisms of science, ancient and modern.

The book irrefutably explains how and why our accepted ideas concerning health and disease are radically wrong. It demonstrates why anyone who critically examines the concepts of infection, immunity, degeneration and even genetics, will be faced with countless contradictions and innumerable unexplained 'facts'. It shows how nobody in the field of conventional medicine can really say why diseases occur.

THE THIRD ELEMENT OF THE BLOOD

by Professor Antoine Béchamp
Published by Ziggurat Books (1994),
PO Box 1767, Collingwood Vic. 3066
Price: AUD\$19.00 (217pp, p/b)
Available: Ziggurat Books (see p. 61).

This book is the last work by a man who should today be regarded as one of the founders of modern medicine and biology, and should be ranked as one of the giants in the history of science.

It is the manuscript that was mentioned above that Dr Levinson obtained from Béchamp himself and had translated into English. So it was first published in English just a few years after Béchamp's death—1915.

The Third Element of the Blood contains, in great detail, the elements of the microzymian theory of the organisation of living organisms and organic materials.

It shows that more than 100 years ago,

the germ or microbian theory of disease was demonstrated by Béchamp, and those who worked with him, to be without foundation and totally inadequate as an explanation of disease and its transmission.

The ancients believed that there is no single cause of disease; Béchamp proved them right and was written out of history for his trouble.

JOURNEY INTO ONENESS

discerning bookstores;

or available from the author, M. J. & T.
Roads, PO Box 778, Nambour Qld
4560, Australia.

This has proven to be the hardest book for me to review so far. To start with, the author is my father, and secondly, I am such a fan of his writing that I am more than likely going to spend the bulk of this review encouraging you to read this book.

There are many descriptions which suit this book—a metaphysical adventure, an exploration of consciousness, out-of-body encounters with non-physical beings—but all of these do not come close to describing the feeling that you are there with the author.

The information imparted and, more importantly, the experiences captured seem to have a magical effect on just about everybody who reads Michael's

REVIEWS

BOOKS

books.

It is very hard in this day and age not to get caught up in the injustice and sadness experienced by many people, and it is harder still to ever find a viewpoint of reality that allows such perceptions to exist, but for positive reason.

This book will excite you and expand your mind to consider concepts of realities that exist only in your wildest dreams.

THE McDANIEL REPORT

by Stanley V. McDaniel

Published by North Atlantic Books (1993), Berkeley, California, USA
ISBN 1-55643-088-4

Price: AUD\$30.00 (USD\$20.00)

Available: See ad on page 37.

We have printed the Executive Summary, as well as the introductory paragraphs to Chapter One from this Report in the article, "The Mars Mission Cover-up", on pages 33-37 of this issue.

Briefly, this report is a thorough examination on the failure of Executive, Congressional and scientific responsibility in setting mission priorities for NASA's Mars exploration programme.

In other words, it shows beyond doubt that the unusual surface features in the region of Cydonia on Mars, warrant further investigation as a matter of urgency. The author also shows that for some strange reason NASA is not interested—or, if it is, it is keeping all relevant data a secret from the public.

This is excellent resource and reference material for anybody interested in the mysteries of Mars.

DIRTY MEDICINE

Science, Big Business and the Assault on Natural Health Care
by Martin J. Walker

Published by Slingshot Publications (1993), BM Box 8314, London WC1N 3XX, UK

ISBN 0-9519646-0-7

Price: USD\$24.00 (729pp, p/b).

Wow! What a great book! 730 pages crammed full of hard-hitting, documented information showing that there is a concerted attack by drug companies (via science, media, educational bodies and big business) on natural health care.

Dirty Medicine deals with UK as well as US health issues. I have reviewed many such titles from the USA and Canada, and even one or two from Australia, so it is interesting to see the same tactics being employed in the UK and Europe.

My only grievance about this book is that I don't know where to tell people to get it from. We ordered ours direct from the publisher, but no details were forthcoming on postage, price, distributors, etc. (I suggest you try NEXUS in a few weeks and we'll try to get it in.)

If you are into health research and need some facts, figures, names and dates on how alternatives to drug medicine are being attacked, then you will want this book.

DISCOVERY OF MAGNETIC HEALTH: A Health Care Alternative

by George J. Washnis and Richard Z. Hricak

Published by Nova Publishing Company (1993), 11607 Nebel Street, Rockville, MD 20852, USA; phone (301) 231 8229, fax (301) 816 0816
ISBN 0-9639560-1-9

Price: USD\$21.95 (347pp, p/b).

This book is for both the layperson who is unfamiliar with magnetic therapy, and the medical professional. It demonstrates that the application of magnetic fields can make a difference in health.

It presents facts, arguments, answers, case histories, controlled studies, analyses and recommendations for further research. Here, in one meaningful publication,

REVIEWS

BOOKS

state-of-the-art techniques of magnetotherapy, physician treatment protocols, and personal interviews and opinions of recognised experts are presented.

Truly an excellent book in its field!

ABDUCTION TO THE 9th PLANET by Michel Desmarquet

Published by Arafura Publishing (1993), Melbourne, Victoria, Australia ISBN 0-646-15996-8

Price: AUD\$16.95 (181pp, p/b)
Available: Distributed by Spectrum Access, PO Box 1241, Toowong Qld 4066, Australia, phone (07) 870 0055, to discerning bookstores.

It is not every day that we get a book written by a man who claims to have been gently abducted and taken to another planet, particularly when that planet is not in our solar system.

I usually read this type of book to find out what sort of message the aliens are trying to get across to us, and to find out what, if anything, the aliens say about the history of the Earth and their involvement with it.

Here the aliens are saying (again): stop killing, love each other, stop destroying the Mother Earth. In a nutshell, they outline the 'colonisation' of Earth by various extraterrestrials way back in days gone by. It is all very interesting but I end up thinking: this is yet another story about the Earth, which in many ways contradicts all the other 'abductee' stories about the history of the Earth—which one do I believe, if any?

While I certainly do not deny the reality of the experience for the author, I grew somewhat sceptical when these supposedly hi-tech, high-love beings calmly blew away some Neanderthals with ray guns. I mean, why not just paralyse them for a while—why kill them?

Anyway, this book is currently roaring up the 'top ten' of UFO/channelling circles, and I'm sure you'll hear a lot more about it.

EMPTY WAS MY HOUSE by Shirley Thomson

Published by Literary Mouse Press, (1994), PO Box 627, Kalamunda WA 6076; phone/fax (09) 291 7651

ISBN 0-947295 52 6

Price: AUD\$17.95 (218pp, p/b)
Available: Literary Mouse Press, or discerning bookstores.

This is a very moving book, and is a well-written example of what must be affecting thousands of people around the world.

The book takes you into Shirley's childhood, with all the sights and smells of family life in Scotland. Then came the War. When her father returned from the war, he was a different man.

Instead of carefree and loving, he was unhappy, withdrawn, and addicted to gambling. An emerging pattern of domestic physical and mental violence, incest and mental cruelty stayed with this beautiful young girl 'til long after leaving home.

The denial of her painful childhood memories led to cancer of the thyroid, a nervous breakdown, diabetes and finally epilepsy.

This is a story of courage and triumph of the human spirit. Shirley's gift as a storyteller enables the reader to open many secret doors inside themselves as they travel with her.

FORBIDDEN ARCHEOLOGY The Hidden History of the Human Race

by Michael A. Cremo and
Richard L. Thompson

Published by Govardhan Hill Publishing (1993), PO Box 52, Badger, CA, 93603, USA; phone (209) 337 2828, fax (209) 337 2354
ISBN 0-9635309-8-4

Price: USD\$39.95 (914pp, h/c).

When a scientific theory gathers the status of a dogma, the possibilities of new research being conducted in that area, and the room for new theories on the matter, become severely restricted. Those who try to break through such barriers run the risk of castigation and prejudice.

Michael Cremo and Richard Thompson are therefore to be congratulated on spending eight years producing the only definitive, precise, exhaustive and complete record of practically all the fossil finds of man, regardless of whether they fit the established scientific theories or not.

Forbidden Archeology takes us through so many anomalies of fossil man. If only one human fossil or artefact of the 50 or

REVIEWS

BOOKS

so meticulously documented and discussed from the Miocene or early Pliocene is correctly dated, then everything concerning the theories of human origins must return to the melting pot. And the evidence is that a large proportion of them are entirely credible.

The book is both entertaining and scholarly. Data is not pressed into the service of any particular doctrine, but presented and left to tell its own story.

Cremo and Thompson also describe the processes by which data gets suppressed—consciously and unconsciously—and discuss all the evidence upon which modern theories are founded.

Forbidden Archeology deserves to provoke discussion and controversy. It should not be swept aside or ignored.

(Extracted with permission from a review by John H. Davidson, M.A. (Cantab.), Cambridge, UK.)

MEDICAL MAGNETS **Nature's Healing Energy** **by Barbara Gordon**

Published by Magnetic Health Products (1991), 5 Burns Street, Byron Bay NSW 2481, Australia; phone/fax (066) 85 7842

ISBN 0-646-07052-5

Price: AUD\$12.00 (45pp, p/b)

Available: See advert on page 79.

A great little book full of simple and easy-to-understand information on magnetism and its health effects.

Topics covered include pain relief, north and south poles of magnets, different types of magnets and their effects, magnetised water, animals and magnets, muscle testing, and when magnets are ineffective.

Illustrated throughout with diagrams and charts, this book is a must for anyone interested in the power of magnets.

A COMPREHENSIVE GUIDE TO CONVENTIONAL AND ALTERNATIVE TREATMENTS FOR AIDS **edited by Claudio Lai**

Published by MPI Productions (1994), PO Box 187, Hollywood CA 90078, USA; phone (213) 368 8125

Price: AUD\$29.95 (128pp, s/b)

Available: MPI Productions, 90

Westbourne Street, Petersham NSW

2049, Australia; phone (02) 569 3493,

fax (02) 745 2494.

This invaluable manual was compiled by Claudio Lai following the production of the video, *AIDS—Alternative Therapies and the Struggle for Legalisation* (see NEXUS review, vol. 2, no. 18).

The rundown it provides on the range of conventional and alternative AIDS treatments is comprehensive, unbiased and eye-opening. It covers information about AIDS epidemiology, HIV testing, opportunistic infections, vaccines, political and social issues, and much more.

The glossary, list of AIDS organisations and extensive bibliography are useful references for interested layperson and researcher alike.

My overwhelming impression from perusing the data on side-effects and efficacy of all the treatments covered is this: given the choice between toxic FDA-approved drugs with damaging, if not fatal, consequences, and the more natural, gentle alternatives with minimal side-effects and greater survival prospects, I'd certainly choose the latter.

Anyone seeking medical advice or trying to make informed choices about which AIDS or HIV treatments to follow, would be well-advised to be armed with this guidebook.

BOOKS

WHO STOLE THE NEWS?

by Mort Rosenblum

Published by John Wiley & Sons Inc.
(1993), 605 Third Avenue, New York,
NY 10158-0012, USA
ISBN 0-471-58522-X

Price: AUD\$45.00 (298pp, h/c)
Available: Jacaranda Wiley Ltd, PO
Box 174, North Ryde, NSW 2113;
phone (02) 805 1100, fax 805 1597.

This book is an intriguing behind-the-scenes critique of how the business of

news operates. With more than twenty-five years' experience as a foreign correspondent, mainly with Associated Press, Mort Rosenblum is well-qualified to analyse why and how the news-making system works—or doesn't.

Who Stole The News? is subtitled, "Why we can't keep up with what happens in the world, and what we can do about it". Despite incredible leaps in the technology of news 'production', we, the news 'consumers', are not getting the quality of information we expect from the mainstream media. To NEXUS readers, this is nothing unusual, but, lest we lapse into cynicism, here we're given a few pointers from an 'insider' on how to combat this state of affairs. To be able to empower ourselves, we first need to understand who the players are and why the rules keep changing in media land.

The news business—be it print, radio or television—is complex and inevitably flawed at all levels: such is human nature. For example, the average news executive is more concerned with increasing ratings or circulation than with fulfilling a very real demand for incisive information and analysis about what's going on in the world.

While Mort Rosenblum's thesis applies more to the American situation, in this global village no intelligent person anywhere can afford to stand back and be manipulated. We, the reading, listening, viewing public, are not brain-dead!

A fascinating lecture by Dr Eva Lee Snead, M.D., from San Antonio, Texas. Dr Snead is an internationally respected

REVIEWS

VIDEOS

lecturer, and a doctor with years of clinical experience. Her lecture shows very clearly the links between viruses in the past, diseases in the present, and vaccines. It shows some shocking connections between vaccines, AIDS, cancer, leukaemia and birth defects.

Dr Snead is the author of two other books, *Some Call It AIDS, I Call It Murder*, and *Say No to Herpes, AIDS and Chronic Fatigue*.

OZONE THERAPY for the Treatment of AIDS and HIV

Produced by MPI Productions/Global Artists Productions (1993). PO Box 187, Hollywood CA 90078, USA; phone (213) 368 8125

Price: AUD\$39.95 (46mins, PAL/VHS or NTSC/VHS)

Available: MPI Productions, 90 Westbourne Street, Petersham NSW 2049, Australia; phone (02) 569 3493.

Regular readers of NEXUS will know how committed we are on the subject of oxygen therapies.

Thus it is great to be able to review such a professionally produced and presented documentary on ozone therapy used in the treatment of AIDS and HIV.

This programme includes interviews with Dr John Pittman, a leader in ozone and AIDS in the US, Ed McCabe, author

of *Oxygen Therapies*, and Brad Anderson, an HIV-positive individual who has successfully used ozone therapy to rid his body of all signs of disease.

It covers how ozone is administered, its effectiveness and results, and also looks at why the FDA is confiscating ozone generators in the USA.

An excellent video and thoroughly recommended.

ANCIENT SECRETS—Part 4: The Egyptian Connection

Produced by Network 23 (1994), 1 The Avenue, Valley Heights, NSW 2777, Australia

Price: AUD\$35.00 (30mins, PAL/VHS)

Available: NEXUS Magazine, PO Box 30, Mapleton Qld 4560, Australia; phone (074) 42 9280, fax (074) 42 9381.

For more information about the contents of this video, you should read the article this issue, titled "In Search of Ancient Secrets".

Unfortunately, room did not permit us to publish as many photos of these remarkable hieroglyphs as we would have liked, but rest assured that this video has faithfully captured both the authenticity and the atmosphere of the site somewhere in the Hunter Valley region of New South Wales.

This video is the fourth in a series that explores a variety of sites and theories relating to the Earth's harmonic Grid pat-

terns, and the future.

The footage on the video is clear, and certainly does justice to the mystery of these ancient carvings.

AUDIO

FIVE DAYS IN A PHOTON BELT

by Warp Factor Nine

Produced by Karmic Hit (1993),
Sydney, Australia

Price: AUD\$24.95 (48mins, CD)

Available: Distributed by Id/
Phonogram Promotions, Australia,
phone (02) 581 1399, and
independent record stores.

Back in 1991, NEXUS printed a story entitled "The Photon Belt", which outlined a scenario involving a huge belt of photons engulfing the solar system some time this decade.

The story grew and grew around the world until one day in early 1992 a news sheet titled "You Must Read This!" circulated around Australia and overseas claiming the photon belt was about to overtake the Earth, and five days of darkness/light would be our fate. All power would go, heat would go, civilisation would grind to a halt. It was to hit by 24th July 1992, or could happen later, even into 1994. Nothing happened!—at least not yet...

...except Warp Factor Nine (Russell, John, Boris and Darren) got together and produced a musical trip where art imitates life, and *Five Days in a Photon Belt* was born.

If you'd like to recapture that amazing feeling when New Agers across the country thought the world was going to end tomorrow, then *Five Days...* has it. The music is pleasant and atmospheric, although when we get to tracks like "The sky has fallen", it really sounds as if it has. I enjoyed the album, especially the

first few intro tracks.

Overall, a good listening album as long as you can handle the empty "Null zone" and huddling "Under the blankets".

Recommended if you'd really like to capture the feeling of five days and nights in a photon belt, to prepare, just in case...

NEXUS had "Volume 1: Healing" to listen to and found the music a relaxing interlude in the day's busy deadline pace. Pleasant vibrational sounds combine in "Floating Symphony", the composition on Side A. It promotes a drifting ambience that lifts the psyche and makes the day lighter. Side B is "Mystic Echo" and is a thoughtful, quiet journey into the mood of the moment.

Both sides offer a gentle massage of the mind and senses, and could be recommended for home, for meditation or just a quiet evening. They would also be excellent in a clinic or practitioners' rooms, to set a peaceful mood for patients and staff.

Terry Cahill has two other cassettes in the *Meditation Moods* series—"Sleeping" and "Balancing"—and the three are available as a package.

Continued from page 47

frequency. Blue light at 420 nm enhances the effect of 650 nm red light. Photosynthesis occurs at approximately 440 nm.

Photosynthesis can be increased up to 400% by means of intermittent light. The early experimenters who reported this effect used a rotating disc with a section removed to chop the light from a lamp. They found that 75% of the light from a given source could be blocked without decreasing the rate of photosynthesis. The improved yields produced by intermittent light depends on the frequency of the flashing. A frequency of four flashes/minute resulted in 100% increased yields. The amount of work done by the light can be increased by shortening both the light and dark periods. Warburg obtained 100% increased yields by using 133 flashes/second. Emerson and Williams improved the yield over continuous light by 300% to 400% using only 50 flashes/second, and making the light flashes much shorter than the dark periods. The necessary dark period is

about 0.03 seconds at 25°C. The light reaction proceeds at about 0.001 second, and depends on the concentration of carbon dioxide. (Ref.: A. M. Dycus and Alice Schultz, *Plant Physiology Supplement* no. 39.)

A plant can be grown in complete darkness if it is connected by an insulated wire to a large metal surface which is exposed to sunlight. The plant is to be in a basement closet and it must be at least six feet above the ground and insulated from the shelf to generate a potential difference or antenna effect. The optimal size of the metal sheet must be determined by experiment so as to avoid sunburn (too large) or yellowing (too small). Plants which are connected in this manner will grow in complete darkness, but unconnected control plants will of course be stunted and lacking chlorophyll. (Figure 6: The Hieronymous System.)

But enough is... Any of the techniques described here can greatly ameliorate crops. This knowledge is a powerful weapon in the war against hunger—if you practise it!

10. The two main extended hypotheses have been put forward by Richard C. Hoagland on the one hand, and the team of John E. Brandenburg, Vincent DiPietro and Gregory Molenaar on the other. Hoagland's view is that the Martian anomalies, if they turn out to be artificial, must be the work of an advanced non-indigenous

technological civilisation which occupied Mars for an undetermined period of time. The Brandenburg, DiPietro and Molenaar hypothesis, which they title "The Cydonian Hypothesis", proposes that the anomalies were built by an indigenously evolved race of humanoid Martians. See references 3 and 16.

11. The Mars Observer spacecraft, launched September 1992, carried the Mars Observer camera, a three-component telescopic imaging system designed for both high- and low-resolution photography of Mars. For a detailed account of the spacecraft and the camera, see references 14 and 15.

A Secret History of the 20th Century

Continued from page 31

closely that he often acted as his boss's 'double', and Schreck's 'death' (in a poorly-staged and undocumented auto accident in 1936) made it that much easier for the devotee to take the place of his master among the charred remains of the Chancellory. Would Schreck willingly allow himself to become the corpse at Berlin? Fanatics and zealots have been known to do much stranger things."

Henderson's account is corroborated by another statement of the Russians in September of 1945: *"No trace of the bodies of Hitler or Eva Braun has been discovered... It is established that Hitler, by means of false testimony, sought to hide his traces. Irrefutable proof exists that a small airplane left the Tiergarten at dawn on 30 April flying in the direction of Hamburg. Three men and a woman are known to have been on board. It has also been established that a large submarine left Hamburg before the arrival of the British forces. Mysterious persons were on board the*

submarine, among them a woman."

Henderson describes the fate of Rudolph Hess, *"...the man who did more to set up the US/Vatican/Nazi connection than anyone else. He vanished into the waiting arms of the Masonic lodges in England, long pro-Fascist and thick as thieves with their continental counterparts, Thule and the Teutonic Knights among them, on the night of 10 May 1941. The double who later served his prison sentence at Spandau and died silent in 1987 fooled only the most casual observers."*

Again in support of Henderson's account, I have found that the psychiatrist chosen to examine Hess was Dr Ewen Cameron, the soon-to-be-infamous CIA mind-control doctor whose activities will be considered later in this book. Cameron reported that Allen Dulles confided to him that the captive in Spandau prison was not the real Hess, but an imposter. Hess, so Dulles explained, had been executed on the orders of Winston Churchill. Attempting a positive identification of Hess by physically locating a World

War I chest wound, Cameron was prevented by guards from doing so.

There has been much speculation about Nazis setting up a secret Antarctic base after the war, with Hitler possibly present; however it is just that—speculation—so far as I can determine. While there was a lot of Nazi submarine and tanker activity in the vicinity of Antarctica during this period, and a search for Germans mounted by the Americans utilising 4,000 troops (suggesting the Allies definitely thought something was going on down there), nothing other than circumstantial evidence and hearsay suggests a German South Polar base was actually established.

There is the possibility that the Antarctic was used as a stopping-off base for escaping Nazis, but evidence suggests that those who were able to escape Nuremberg eventually went elsewhere, although probably not to the Moon or Mars. ∞

An Evolving Nature

Continued from page 25

be so active with nonworldly Beings. Is this usual?"

"Both we and the Grey Ones can accommodate your linear time, appearing in any 'when' that is appropriate. In a greater reality, your past, present and future all occupy the same spherical moment."

"Does that mean I could learn about our future?"

There was a hesitation. "Yes, it is possible, but only as a probability. Nothing in any measure of time is absolute. You would gain more confusion than clarity from such an exercise."

I thought about my next question carefully. "I learned about the Grey Ones by tuning in to them. The fact that you came to assist me suggests you are some kind of cosmic counterbalance?"

"You could say that. The Grey Ones try to negate other Beings. Humanity is not their only target. We seek to support those who focus on their spiritual integrity and love." I saw a whimsical smile on the features of the Blue Being

who was communicating with me. "Generally, the people we aid are unaware of this. We do not manipulate people; we support them with a projected love and inspiration. Unlike the Grey Ones, we do not appear physically in your dimension. Although it is possible, it is extremely uncomfortable."

I grinned. "You're the good guys," I joked.

All three looked amused. "We do not relate to life in terms of good or bad. We are attracted to those Beings who seek to express their greatest potential of unconditional love. The Grey Ones play with shadows. Their own enlightenment is delayed while they play in the darkness of their own negativity. They seek to involve other races in their games of self-deception, thriving on the negative emotions that are invoked. However, they are unable to influence any humans who focus on their spiritual growth. The Grey Ones are not comfortable with Light and Love, as you discovered."

"Were you watching?"

"Watching is not the correct term.

We embraced the situation. We wished to observe how you would behave. We could have altered your reality instantly had there been a need to do so."

"Who are you? Where do you come from?" I asked.

"There are many people on Earth who know of us. It is generally accepted that we come from the Pleiadian group."

"Which is, of course, no answer at all."

"If the memory is not yet there, we deem it wisest not to invoke it. Once before, you had a dream experience of us that proved to be very unsettling. Be patient; allow this knowledge to emerge in natural timing."

During the conversation, the Blue Beings remained grouped together. One of them now touched a small gadget at its waist, and the spinning spherical craft reappeared, enclosing them. Very neat!

Although I could no longer see them, I felt a wave of love moving through my psyche. Silently I heard, "Our love is with you, always."

Just like that, they vanished. ∞
